HP Pavilion Laptop 13

Ups the ante of the Pavilion Series

The HP Pavilion series has been the go-to option for value-buyers. The new Pavilion Laptop 13 sticks to the same idea but there are some additions that make it feel more like a premium machine without costing nearly as much. Let's see how it does in our review.

BUILD AND DESIGN.....80
FEATURES.....84
PERFORMANCE.....56
VALUE.....70

BUILD AND DESIGN

The new Pavilion Laptop 13's svelte aesthetics took us by surprise. We absolutely love how the Pavilion Laptop 13 has inherited many of the design features of the Spectre and even the Envy series. HP has done a great job and the end result is a product that looks classy. The laptop only weighs 1.24kgs, which makes it very comfortable to carry around. Although the Pavilion Laptop 13 sports a premium design, the chassis is made out of plastic. That's particularly noticeable because it is susceptible to flexing. The lid also flexes quite a bit.

The HP Pavilion Laptop 13 also comes with dual speakers. These speakers are tuned by B&O and they get decently loud. Overall, the HP Pavilion laptop 13 is a well-built machine that should impress most.

PERFORMANCE

The HP Pavilion laptop 13 unit we received comes with an Intel Core i5-1135G7 processor and the Intel Xe graphics. You also get 16GB of DDR4 RAM and 512GB NVMe SSD. We ran all the benchmark programs on Windows' Best performance mode. Starting off with PCMark 10, the laptop managed to score 4,704. On Cinebench R20, it scored 1599. It's, in fact, higher than what the Dell XPS 13 had managed to score with its Intel Core i7-1065G7.

For testing the GPU, we loaded 3DMark's Fire Strike benchmark and got a score of 2909, putting it high up on the list of mainstream laptops we tested.

Coming to the real-world tests, the laptop managed to hold its own during our testing process. It was easily able to handle the notorious Chrome browser with about 25-30 tabs spread across multiple windows. We also did some gaming on this laptop. AAA titles like GTA V and Witcher 3 will give you playable frame rates at low settings.

Lastly, we tested the 512GB M.2 NVMe SSD using the CrystalDisk-Mark. The program gave sequential read and write speeds of 2301.58 MB/s and 1066.47 MB/s respectively.

DISPLAY

The HP Pavilion Laptop 13 comes with a 13.3" FHD IPS display. We used the Portrait Displays C6 HDR2000 colourimeter to test the display. It peaked at a maximum brightness of 269 nits against the advertised 250 nits. It's not the most colour-accurate panel in the

world, so it's not ideal for colour-sensitive work. The panel was only able to reproduce 60% and 39% of sRGB and DCI-P3 colour space accurately.

BATTERY LIFE

The HP Pavilion Laptop 13 packs a 3-cell 43Wh battery. On Wi-fi and at peak brightness, we were only able to get about 5 hours of real-world usage with the performance mode set in favor of the battery. In the PCMark 10 Modern Office Battery Life test, the HP Pavilion Laptop 13 lasted for 394 minutes. What's good about the battery, however, is that it doesn't take too long to fully charge up.

KEYBOARD, TRACKPAD AND I/O

The HP Pavilion Laptop 13 features a standard full-size keyboard in which the keys are backlit. It's not a bad keyboard and is very easy to get used to. You will also come across a fingerprint reader on the keyboard deck. The touchpad is quite small. It feels cramped in this small form factor, and you might want to consider investing on an external mouse. Moving on to the port selection, there are two USB-A ports and a USB-C port that are compatible with both Power Delivery and DisplayPort. You also get an HDMI 2.0 port and a headphone/microphone combo. You also get a microSD reader.

VERDICT

The HP Pavilion Laptop 13 is priced at ₹71,999 in India. And at that price, you get an Intel Core i5-1135G7 with Intel Iris Xe graphics, a good FHD display, 16GB of RAM, and 512GB M.2 NVMe SSD, all wrapped in a chassis that looks and feel great to use. What we didn't like was its battery life. HP can definitely put in more work to make it last a little longer.

—Karthik Iyer

SPECIFICATIONS

PROCESSOR: Intel Core i5-1135G7 | RAM: 16 GB DDR4-3200 | STORAGE: 512 GB PCIe NVMe M.2 SSD | DISPLAY: 13.3" FHD IPS panel, 250 nits brightness.
