OnePlus 9R

Got something for everyone

OnePlus recently launched its latest flagships, the OnePlus 9 series of phones and the OnePlus 9R is the company's new entry flagship that competes in the highly competitive under ₹40,000 segment of the market.

DESIGN AND DISPLAY

The OnePlus 9R is an entry-level flagship, one that can easily pass off for a premium device plying its trade in a higher segment than its price point would suggest. The phone uses a sheet of toughened Gorilla Glass on the front and the back for protection, which also helps provide the device a smooth finish when you hold it in the hand. The back panel also features 3D curves to improve the ergonomics and in-hand feel of the device.

The device brings with itself a 6.55-inch FHD+ Fluid AMOLED display that can be set to either refresh at 60 or 120 Hz. Much like the OnePlus 9, this display is also non-curved in nature, and can be pretty bright. The company claims that the OnePlus 9's display can go up to 1100nits at peak when consuming HDR content but otherwise we found that it can peak at 713 nits. Our readings from ColorChecker showed the display to have an Avg DeltaE error of 1 and a maximum DeltaE error of 2.06 while covering 98.924 per cent of the DCI-P3 colour space.

PERFORMANCE

Games ran without any hitches and browsing content on the device or switching through apps was a breeze. The device ran both Call of Duty Mobile and Asphalt 9 Legends at maxed-out settings, without any frame drops or stutters. The results for both games showed a median FPS of 60 frames at the stability of 100 per cent. Now that's impressive. Especially considering the fact that

neither the OnePlus 9 nor the competing Vivo X60 managed to achieve such high stability for frame rates.

The only place that the OnePlus 9R lagged behind other devices was in synthetic benchmarks. The device scored a total of 603,500 points on AnTuTu that only trails the 708,100 points scored by the Snapdragon 888 totting OnePlus 9.

We also got similar results while testing it using 3DMark's Wild Life test. Here we found the OnePlus 9R to be closer to the OnePlus 9 and Vivo X60 Pro in terms of scores as these devices scored a total of 5682 and 4206 points, respectively. In comparison, the OnePlus 9 scored 4170 points, which again, is pretty good.

CAMERA

The main lens can capture some really nice daytime shots with well-balanced colours. It also captures a good amount of detail resulting in good sharpness, including the edges. The dynamic range of the captured pictures is good, even if not at par with the results received from the bigger sensors of the OnePlus 9

and OnePlus 9 Pro. The ultra-wide camera on the OnePlus 9R is a 16 MP Sony IMX481 sensor with an f/2.2 aperture. For the most part, this lens does impress but they are nowhere close to other two OnePlus 9 series phones.

Apart from this, the OnePlus 9R also features a more than usable 5-megapixel macro lens and a 2-megapixel monochrome lens. The former will definitely be of great interest to a lot of users as it outputs good results.

Both the primary and ultra-wide lens are more than usable in low-light situations, and can be further improved by using the AI-based Nightscape Mode. Lastly, we also have a 16-megapixel front camera on the device. This lens captures accurate skin tones and details.

BATTERY

The phone comes with a 4,500 mAh battery pack which can charge from 1-58 per cent in 15 minutes and to full charge in about 45 minutes. Even with heavy usage including gaming, streaming content on Netflix, and clicking a lot

of photos, the OnePlus 9R still gets you through the day.

VERDICT

While getting a Snapdragon 870 SoC instead of the 888 may be a deal-breaker for some, in our opinion, it really shouldn't be the case. The OnePlus 9R is properly geared to take the battle to the crucial sub-₹40k segment of the market.

—Sushant Talwar

SPECIFICATIONS

WEIGHT: 189 g | DISPLAY SIZE: 6.55-inches | RESOLUTION: 2400 x 1080 pixels 402 PPI | REFRESH RATE: 120 Hz | OPERATING SYSTEM: OxygenOS based on Android 11 | CPU: Qualcomm Snapdragon 870 | 5G CHIPSET: x55 | GPU: Adreno 650 | RAM: 8 GB/12 GB | Storage: 128 GB/256 GB | BATTERY: 4,500 mAh with Warp Charge 65 W | CAMERA: 48 MP + 16 MP + 5 MP + 2 MP rear cameras, 16 MP front camera | FINGERPRINT SENSOR TYPE: In-display
