you can choose from one of the following Google One plans:

- 100GB Plan – ₹130/ month or ₹1300/ year
- 200GB Plan – ₹210/ month or ₹2100/ year
- 2TB Plan – ₹650/ month or ₹6500/ year

You can sign up for these plans on the Google One website. Users get a discount of 2 months if they go with annual payments. Before going forward with this, do note that if you have a Google Pixel phone, you are exempt from any Google Photos limits and can continue to enjoy free uploads.

Google One membership also entitles users to share their cloud storage with family members and to seek support by the mail or via chat when needed. Other membership benefits include special access to Google Photos editing features on Android, Google Play credits, and free trials on Google services like Stadia Pro and YouTube Premium.

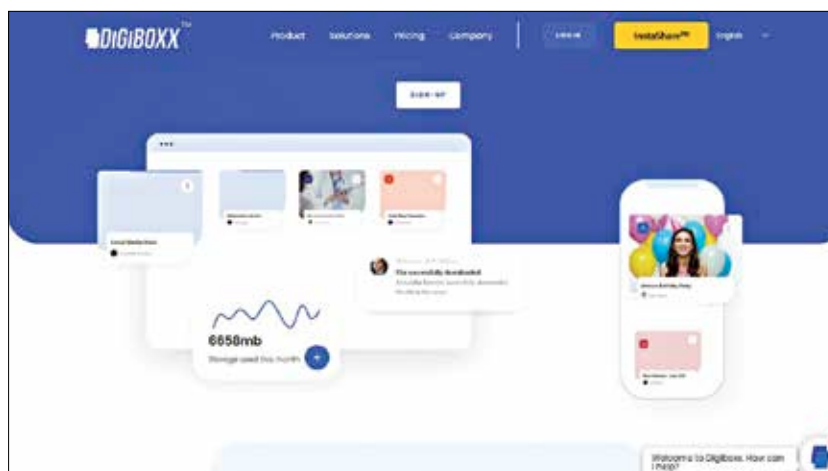

It must be mentioned that among popular cloud storage options like One Drive, Dropbox, Apple storage, Amazon cloud storage, etc., Google's pricing is the most reasonable for India. So, if you are okay with a paid subscription, you may continue with Google Photos.

HOW TO DOWNLOAD ALL PHOTOS FROM GOOGLE PHOTOS?

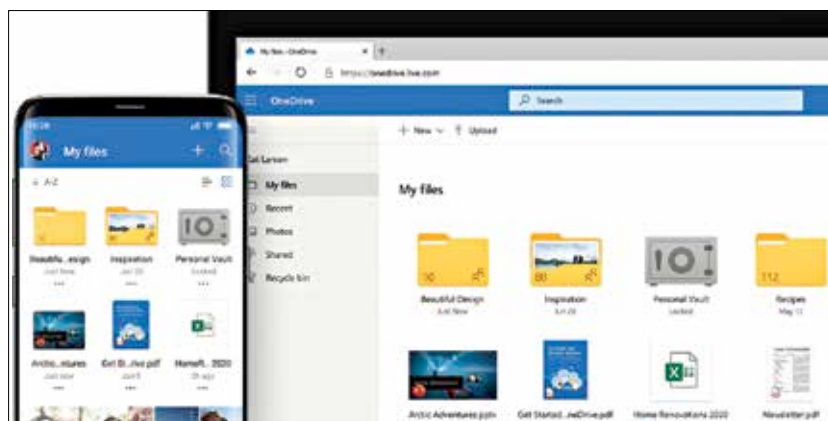

If you have decided to move on from Google photos altogether, you can download all your Google photos and back them up using alternate services. The easiest way to download all Google Photo albums at once is using Google Takeout.

- Go to the Google Takeout page and click on the 'Deselect all' option at the top of the list.
- Now scroll down the long list of data Google maintains and check Google photos. Now proceed to the 'Next step'.

You can choose the size of downloads and between 'zip' and 'tig' file type.

Digiboxx, Indian cloud storage service

Microsoft OneDrive is a popular alternative

If you want to only back up a particular album, open Google Photos from your PC browser.

- Now go to Albums, and open an album you wish to download.
- Click on the triple dot menu on the top right corner (after opening the album) and you will find a 'Download all' option in the menu that unfurls.
- Press the download button to get a zip file of all images within that particular album.

You may repeat for all other albums you wish to download.

GOOGLE PHOTOS ALTERNATIVES

Once you have downloaded all your data, you can easily save it across different services or keep it on a local device like a NAS setup. Here are a few economic cloud storage options that you may try:

- **Mega** – Offers 50GB of free, encrypted cloud storage to all users. Mega mobile app is available for Android, iOS and Huawei App gallery, so users can upload photos from their phones as well.
- **Digiboxx** – Digiboxx is India's cloud storage platform that offers 20GB of free storage and 100GB of SSL secured cloud storage per month for just ₹30.
- **Microsoft One Drive** – If you already have an office 365 subscription, you can use 1TB of allotted space to backup your photos. If not, you will have to pay ₹140 per month for 100GB of cloud storage.
- **Degoo** – Degoo is well suited for people who need high storage capacity. It offers 10TB of cloud storage for a one-time payment of \$99 (roughly ₹7,250).
