

Valve's portable gaming PC

Valve is working on a portable gaming PC which would be a direct competitor to the Nintendo Switch. <http://digit.in/jun21-13>

Wear OS is saved!

Google is building "a unified platform with Samsung" that will combine "the best of Wear OS and Tizen". <http://digit.in/jun21-14>

iQOO 7 Legend

High performance made affordable

The iQOO 7 Legend is the company's second outing in India after the iQOO 3. At its asking price of ₹39,990, the iQOO 7 Legend is one of the most affordable flagship phones powered by the top-of-the-line Qualcomm Snapdragon 888 processor. Here's how the iQOO 7 Legend performs.

DESIGN AND DISPLAY

The iQOO 7 Legend looks very elegant in the hand. It has a soft-touch matte finish that is highlighted by three coloured stripes running across the back. For the iQOO 7 Legend, the company partnered with BMW M Motorsport and created this "track design".

Due to the matte finish on the back, it is resistant to fingerprints and smudges. The iQOO 7 does not have Gorilla Glass protection and neither has it received an IP rating. It has a Type-C port and dual stereo speakers.

The iQOO 7 features a 6.62-inch Full HD+ resolution display that uses an AMOLED panel with support for a 120Hz refresh rate. The phone's display is certified for HDR10+ playback and has Widevine L1 support. The display on the iQOO 7 offers 1300 nits peak brightness and can get really bright with good sunlight legibility.

The screen of the iQOO 7 is perfect for consuming content as it has good colour accuracy and crisp details. The high 120Hz refresh rate helps make the animations smoother.

The iQOO 7 has a MEMC chip that oversamples frame rates in games like Call of Duty: Mobile and Free Fire. There is an option in the game assistant menu to boost the frame rates of the two games to 120Hz even though they are natively 60Hz.

PERFORMANCE

The iQOO 7 Legend is powered by the Qualcomm Snapdragon 888 processor. This is backed by the Adreno 660

GPU along with up to 12GB LPDDR5 RAM and 256GB UFS 3.1 storage. In our daily use, the iQOO 7 Legend showed no signs of stress. On the AnTuTu benchmark tests, the iQOO 7 Legend scored 827163 points, while Geekbench awarded it 1136 points in single-core tests and 3694 points in multi-core tests. These are some of the highest scores we have seen both on AnTuTu and Geekbench. The iQOO 7 performs flawlessly when it comes to games such as Call of Duty: Mobile, Asphalt 9, Free Fire, Injustice 2 and more.

The phone runs FunTouch OS 11.1 which is based on Android 11. The UI is snappy, easy to use and offers tons of personalisation features but it is no OxygenOS or One UI.

BATTERY

The iQOO 7 Legend is equipped with a 4000mAh battery that supports 66W fast charging out-of-the-box. We were easily able to get over a day's worth of usage from the phone in a single charge, with the phone set to a 120Hz refresh rate. If the phone starts running out of juice, you can always top it up in 25 minutes from 0-100 percent using the 66W fast charging adapter.

CAMERA

The iQOO 7 Legend is equipped with a triple camera array headlined by a 48MP camera. The phone produces great pictures in daylight that have crisp details, a balanced colour profile and just look very close to the natural imagery. The telephoto camera on the iQOO 7 Legend has slightly cooler tones than the primary camera but produces well-detailed images. As for the wide-angle camera, the iQOO 7 takes decent and usable wide shots. The images from the macro mode also came out pretty well although zeroing in the focus was a bit of a hassle. In a low-light environment or at night, the camera can pick up details well and the night mode boosts the highlights, brightens the frame and smoothens the textures in the picture. Having said that, details near the edges do not come out as detailed as in the normal mode.

VERDICT

The iQOO 7 Legend is a supremely powerful smartphone that offers a smooth and lag-free gaming experience. With the Snapdragon 888, we saw some of the top scores in benchmarking tests and in our day-to-day use. The iQOO 7 Legend surprised us with its camera performance and can take some great pictures as far as gaming smartphones go. If you're someone who is looking to buy a gaming phone under a budget, the iQOO 7 Legend should be at the top of your list.
