

things that you can try to make it better according to your requirements.

MAKE NESTED TO DO LISTS

There must have been a frequent occurrence in the life of an overtly organised individual, where they set a reminder with certain note attached to it, but a part of the work gets lost in the process. Microsoft To Do lets users make a custom nested to do list, which lets the users complete all the tasks under an activity and keep the track of the same. To make a nested to do list, all you will need to do is create a new list, which when

neat integration of your Outlook calendar into the app, wherever it is accessed so that you can plan your day according to what is in store for you to complete at your workplace. It is not complicated at all. All you will need to do is sign in with your work Outlook account, where all of your Outlook Tasks are listed. The app will auto'magically' bring in all the tasks to your calendar, making space for the activities that can be fit in the remainder of the time. This feature can particularly be handy for students who plan their days because this works with Teams too,

Here's how a nested list in the app looks like

opened will give you the option to add other tasks under it, by clicking on the '+' icon in the bottom right corner of the app screen. Once added, there can be additional steps added in that task. This can be accomplished by tapping the task and adding steps, and if needed the files that would need to go with it.

ADD YOUR OUTLOOK CALENDAR TO THE APP

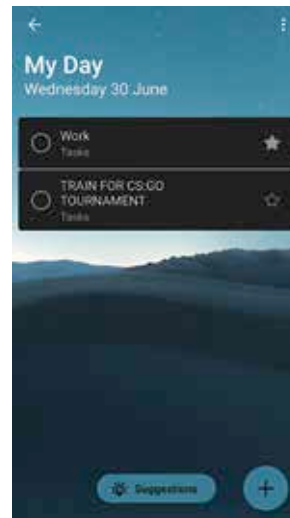

Microsoft has added the

which means the assignments mentioned there get synced with this app, once configured to do so.

USE IT ANYWHERE

Many may not know this, but Microsoft To Do is a cross platform app which lets its users to customise their calendars and schedules from any device given that all of them are on same Microsoft accounts. Say, if you are working on your laptop and are reminded of the meeting that you have

The day's schedule as shown in Microsoft To Do

scheduled for the next day. You can simply log into the Microsoft account either on the web browser or the app and make the relevant changes to your schedule. This will then be synced with all your devices once you open them and connect to the internet.

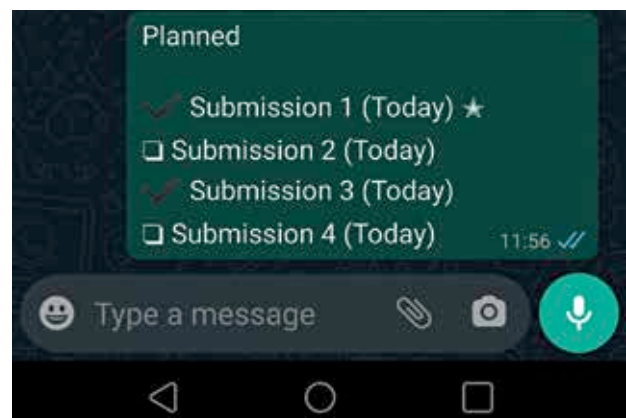

SHARE WHAT YOUR DAY LOOKS LIKE WITH FAMILY AND FRIENDS

Microsoft To Do allows you to share a really easy to understand overview of your day, if you want to share it with others to let them know how your day looks like. Just go the list/task that you want to share and hit the three

dots on the top right corner of your screen. Doing so will show you a menu with two different options to share your schedule with others. The first one is, getting a printed copy of the schedule or send the same over the internet using any of the apps that you have on your device. The most intriguing part of this is that it marks which of the tasks have been done and which ones are left to be completed, giving the receiver of the data, a good overview of what has been done and what needs to be done, and if it has a high priority.

TRELLO: ORGANISE EVERYTHING WITH ANYONE, ANYWHERE

Online collaboration has been the name of the game since 2020, when the pandemic hit us hard. And, as it has in its name, Trello: Organise everything with anyone, anywhere, the app is being used for collaborative efforts by groups of individuals across the professional and educational spectrum. Have a look at some of the things that we have brought to you in order to help you make your organisational efforts using Trello better and more efficient.
