

Notice the new fonts and that blurred background

The new wallpaper + centered Taskbar + new icons!

the first time it's moving away from its home on the left of your screen. That's a big deal, because it's been there since Windows 95! When something changes after 26 years, you can't help but make a big deal about it. In Windows 11, both the position and the design has changed. The Start Menu and the taskbar icons are now aligned in the center of the taskbar rather than the usual left. Of course, because there are many people who have a 26-year muscle-

memory twitch of moving a mouse to the bottom left of their desktops, this is currently a change that can be undone from Settings.

The design and the UI of the Start Menu is drastically different. Windows 11 now features a grid of recommended apps on the top and recently accessed/recommended files to open in the bottom, and Live Tiles have gone the way of the Dodo, which is a good thing, because only Dodos used them!

Our initial reaction was to move the start menu back to the bottom-left, and we think many desktop users are going to do that. First time users probably won't care though, and most of them will be kids using Windows 11 on portable touch devices, where the centre alignment actually works.

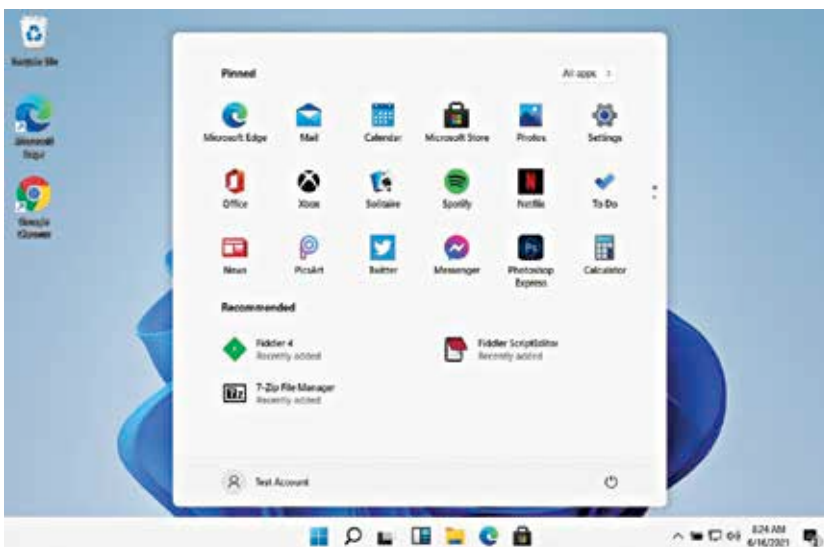

## WALLPAPERS + THEMES

When it comes to the beautification of the OS, Windows 11 does it better than Windows 10. Here's why. First of all, in Windows 10 we get the default blue Windows themed wallpaper. In Windows 11, we get a lot of new, non-Windows themed wallpapers.

Windows 11 also has wallpapers for both light and dark themes. This means that if you have a Dark theme setup on a schedule, then your wallpaper will change along with the theme. While theming was always possible in Windows, with Windows 11 it's just *really* easy to do.

## ROUNDED CORNERS

Doing away with sharp edges is just accepted as normal now, and Windows 11 does that visually. Again, this was always possible to do with apps and the like, but having it out of

The Start Menu is now centered by default
