

Water vapour on Jupiter's moon!

Astronomers have discovered evidence of water vapour on Jupiter's moon Ganymede using Hubble. <https://digit.in/aug21-77>

Sad Wolverine Meme now a toy

The Sad Wolverine meme will be immortalized as an action figure. <https://digit.in/aug21-78>

Letter of the Month

I have been an on-off subscriber of Digit for over 20 years now. I remember the magazine was originally launched as Chip Magazine and then later re-christened as Digit; an avatar which it retains till date.

I was intrigued by the Chip magazine because it had offered some freebies related to The Matrix movie, way back in the year 1999-2000. I purchased my first copy after accumulating money from my puny little allowance and buying it for cheap at Dadar Station, Platform No. 4 Wheeler Store. I have been hooked to technology ever since.

Since I am a western movie fan, I am going to classify my experience of reading the magazine over the past 20 years as follows:

The Good:

- Unbiased, detailed, technical analysis of new products.
- Annual awards for the best in category (although for phones I find that you are skewed in favour of Apple).
- Technical articles on new, emerging technologies and also from various branches of science & technology. I especially like the parts relating to space & exploration.

- Extensive coverage on "Cover Story" – very detailed story, with thorough background study and relevant, up to date information.
- Android Games Apps – I have got to know so many good games from browsing this section!
- Affordable – You have managed to keep the price fixed for so long that it stays within the reach of most technology enthusiasts.
- Greed (Take my Money) Section: Absolutely love it!!!

The Bad:

- Typographical errors! There was a time when Digit copy was (apparently) proof-read by Oxford and Cambridge scholars. The grammar and language was that good. These days, there are typographical errors galore. Sentence structure is in line with that of the modern, short attention span generation.
- Continuing the above thought: Reviews are written with no coherent structure & the headings/titles of the review seem forced, with no segueing from one to the next.
- Headphones/Earphones review: often too technical, even for audiophiles like me. Sometimes, a simple "excellent" or "meh" will suffice for headphones.
- Skoar section – I am not really a fan of gaming, other than old time RTS games such as StarCraft & Red-Alert. But I guess there are enough people who want to read about the latest games.

digit diary

If you are ever curious about what the **Digit gang is up to**, this is the place to get all the inside info. From the **latest game we're obsessing about** to the newest intern we're driving up the wall – it's all here folks.

Surprise! You're reading this issue much earlier in the month than the previous two months. We've been breaking our backs to get the issue out as per the usual schedule and that's had a few wonderful effects on some of the team members. We've been moving from one issue closing to the next one without a break and the stress has started showing. Manish was invited to talk about the Indian gaming and he went on rambling for quite a bit and even threw in a few

choice words to get the message across. We shall obviously not reveal how exactly he "enlightened" all those kids that attended his seminar but know this, those kids learnt some new ##### that day.

You'd assume that everyone on Team Digit

would be part of the same side of the Right to Repair debate but that isn't the case. A certain somebody went on a passionate rant about the glorification of capitalism and had the others quite intrigued as to how this person ate up all the propaganda that lobbyists have been shoveling. While a consensus was never achieved at the end of the day,

most of us have now started wondering if said person is part of a greater conspiracy by lobbyists to infiltrate the media in each country. WE ARE WATCHING YOU! YOU KNOW EXACTLY WHAT WE'RE TALKING ABOUT AND DON'T YOU DARE EDIT THIS.
