

SECURITY WATCH

Phishing in messaging apps

Anonymised data provided by Kaspersky Internet Security for Android users has revealed the most popular messenger apps targeted by phishing scammers. The largest share of malicious links detected between December 2020 and May 2021 was sent via WhatsApp (89.6 per cent), followed by Telegram (5.6 per cent) in second place and Viber (4.7 per cent) in third place. Google Hangouts accounted for less than one per cent of the detected malicious links. As per the report, the countries that experienced the highest number of phishing attacks via messaging apps were Russia at 46 per cent, Brazil at 15 per cent, and India at 7 per cent. Globally, 480 detections were recorded per day. "Statistics show that phishing in instant messenger apps is still one of the most popular tools among scammers. Vigilance combined with anti-phishing technologies is a reliable tool in the fight against phishing in messenger apps," commented Tatyana Shcherbakova, Senior Web Content Analyst at Kaspersky.

MOBILE WATCH

Samsung Galaxy Z Flip 3

The Samsung Galaxy Z Flip 3 5G is ready to make an appearance at the Unpacked 2021 event on August 11, 2021. The Samsung Galaxy Z Flip 3 5G design renders come courtesy of Winfuture.de and they reveal a familiar design with a few changes. As per renders, the phone features a 6.7-inch 120Hz AMOLED display and a 1.9-inch secondary display. The Z Flip 3 will likely feature a dual-lens setup featuring a 12 MP + 12 MP configuration and a 10MP punch-hole camera at the front. Samsung is likely to equip the Galaxy Z Flip 3 5G with a stronger hinge and an IPX8 rating. In terms of performance, Samsung will pack in the top-spec Snapdragon 888 SoC inside the Galaxy Z Flip3 5G along with 8GB RAM and offer two storage options – 128GB and 256GB. The Samsung Z Flip3 5G could feature a 3,300mAh battery along with a 15W fast charging feature.

APP WATCH

Opera GX: Gaming Browser

In 2019, Opera launched a desktop browser specifically for gamers to set itself apart from popular browsers. Now, Opera has launched the Opera GX Gaming Browser for Android and iOS devices. This mobile gaming browser is an extension of its desktop counterpart. Opera GX Mobile includes the GX corner in its browsing spaces that dis-

plays the latest gaming news and updates. There's also a game release calendar here that allows users to glance at the release dates of awaited games. There's also an option to avail deals on paid games via deal aggregator links available on the browser.

The browser comes with four themes to choose from – GX Classic, Ultra Violet, Purple Haze, and White Wolf. To up its standing as a gaming-centric browser, the Opera GX mobile browser will include a Fast Action

Button (FAB) that incorporates vibrations and haptic feedback for an interactive and immersive experience. The browser also comes with a Flow feature that allows users to sync the mobile browser to its web cousin via QR

code scanning. The feature is encrypted and allows users to transfer files, links, YouTube videos, photos, and more to their PC, and vice versa, via a "chat-like space". Furthermore, the browser also has built-in integration for services such as Twitch and Discord.

Privacy Dashboard

If you want to try out the new Privacy Dashboard, but don't have an eligible device to run Android 12 Beta 2, you can get the app on the Play Store. It lets users try out this Android 12-exclusive feature on older Droid devices.

Videoleap by Lightricks

Videoleap by Lightricks is a popular video editing app that is now available on Android. Previously an iOS-only app, Videoleap brings the power of video editing on a desktop, to mobile, with several tools to edit and customise videos on mobile.

KWGT Kustom Widget Maker

If you want to spruce up your lock screen or your Android launcher, the KWGT Kustom Widget Maker is a nifty app for Android that allows you to create your own designs.
