Oppo Reno 6 5GA good blend of looks and performance

Oppo's premium lineup of smartphones under the Reno series has recently been updated to include the Oppo Reno 6 and the Oppo Reno 6 Pro in India. Priced at Rs 29,990, the former offers a gamut of appealing specifications and features, looking very impressive, on paper, at least. Let's see how it fared.

BUILD AND DISPLAY

The Oppo Reno 6 not only looks but also feels premium. It features Oppo's Reno Glow design where the rear panel changes colours as light falls on it. The Oppo Reno6 has a flat-edge design that is reminiscent of the iPhone 12 series' design. The Oppo Reno 6 is also super lightweight, weighing merely 182g, and sports a thickness of 7.59mm.

The phone has the USB-C charging port, a single speaker, and a SIM tray at the bottom of the device. On the right, you have a power button and the left side has the volume rockers. The phone also features an in-display optical fingerprint sensor. The sensor is fast and pretty accurate.

The Oppo Reno 6 comes packing a 6.43-inch AMOLED display with Full HD+ resolution and 90Hz refresh rate support. The display is plenty bright to use indoors or outdoors, even in harsh sunlight. We recorded a max brightness of 620 nits. It feels premium and has pretty decent colour accuracy as well. The screen also offers good viewing angles and vibrant colours.

PERFORMANCE

The phone houses the new MediaTek Dimensity 900 SoC and pairs it with 8GB RAM and 128GB storage. We ran our usual slew of benchmarks to gauge the performance of the device and the results weren't very convincing. In AnTuTu, the Oppo Reno 6 scored

BUILD	72
FEATURES.....	69
PERFORMANCE.....	66
VALUE.....	68

slightly lower than the Snapdragon 768G powered iQOO Z3 5G and considerably lower than the Realme X7 Pro. In GeekBench 5, the Oppo Reno 6 scored 712 in the single-core test and 2113 in the multi-core test.

Synthetic benchmarks aside, the Oppo Reno

6 performs admirably well for the most part. You will have no problem whatsoever accomplishing day-to-day tasks. Thanks to the 8GB of RAM plus the expandable vRAM, the phone is excellent at multitasking as well. As for gaming, we played Call of Duty: Mobile and Asphalt 9 Legends to test its gaming chops. The phone performs adequately well when running games with smooth graphics and frame rates. There were occasional hiccups or frame drops during longer gaming sessions, but nothing that's a dealbreaker. Moving on to the software, the phone runs ColorOS 11.3 on top of Android 11. While ColorOS provides plenty of customisation options and a decent look, it is loaded with bloatware in the form of third party apps.

CAMERA

Oppo has the reputation of putting in a lot of extra effort for its phones'

cameras and the Oppo Reno 6 is a good example of that. The phone houses a 64MP primary lens, an 8MP ultrawide shooter, and a 2MP macro sensor.

The primary 64MP lens churns out detailed and vibrant shots in daylight with good colours and dynamic range. In low light scenarios, this lens produces decent shots, although they are sometimes plagued with noise. Thankfully, the phone's Night Mode makes up for this fault by churning out good low light images with plenty of detail and very little noise. The phone also brings along with it some really interesting video features such as Oppo's Bokeh Flare video mode that adds cinematic effects in portrait videos. The phone's 32MP selfie camera offers good detail and colours in most scenarios.

BATTERY LIFE

The Oppo Reno 6 houses a moderately powerful 4,300mAh battery with support for 65W fast charging. While the phone's battery won't compete with power champs that sport large 5,000-6,000mAh batteries, it is enough to power through most users through a day of usage. In our battery tests, the phone lost 5 per cent of battery life when playing Call of Duty Mobile and lost 7 per cent battery when streaming content on Netflix for half an hour. The 65W fast charger powered the phone from 0 to 100 in merely 36 minutes.

VERDICT

The Oppo Reno 6 stands tall amidst its competition due to its stellar, eye-catching design and good overall performance. The Oppo Reno 6 offers a good blend of looks and performance.

—Dhriti Datta

SPECIFICATIONS

PROCESSOR: MediaTek Dimensity 900 5G SoC | GPU: Mali G-68 | DISPLAY: 6.43-inch AMOLED (1080x2400) | DISPLAY REFRESH RATE: 90Hz | FRONT CAMERA: 32MP | REAR CAMERA: 64MP + 8MP + 2MP | RAM: 8GB + up to 5GB vRAM | STORAGE: 128GB | BATTERY CAPACITY: 4300mAh | FAST CHARGING: 65W SuperVOOC 2.0 | OPERATING SYSTEM: Android 11 with ColorOS 11.3 on top
