

## Sony acquire PC porting studio

Sony has changed its stance on PC gaming in recent times, and we've known that they're looking to bring more of their IPs to PC. To that end, they've acquired porting studio Nixxes to make that happen. Nixxes have previously worked on porting several of Square Enix's games to PC.

## Gaming on Netflix

Netflix is looking to expand into video games, and their most recent hire, Mike Verdu, certainly seems to be a step in that direction. Mike Verdu is a former Facebook and Electronics Art executive, and has joined Netflix as their new VP of game development, as reported to The Hollywood Reporter.

## Assassin's Creed Infinity

The next Assassin's Creed game, Infinity, will reportedly be a cross-studio collaborative project that will be taking a different approach from the way we've normally consumed AC games so far. Rather than a new title releasing every year or bi-year, Infinity will simply keep evolving with new content and updates.

## Activision Blizzard lawsuit

After a recent lawsuit against video game studio Activision Blizzard for a history of harassment and discrimination, employees at the studio – unsurprisingly – staged a walkout. The walkout was reportedly organised by the employees following the company's initial response to the civil lawsuit. Company CEO Bobby Kotick eventually did end up apologising for the company's "tone deaf" response.

## PS5 is the fastest selling PlayStation

Sony has sold more than 10 million PS5 consoles, making it the fastest-selling console in Sony's history. Spider-Man: Miles Morales has sold more than 6.5 million copies since its launch in November, and Ratchet & Clank: Rift Apart has sold more than 1.1 million copies since its launch in June. Sony is also coming out with a revised model of its Digital Edition, which will be 300 grams lighter than the current digital model, which weighs 3.9kg.

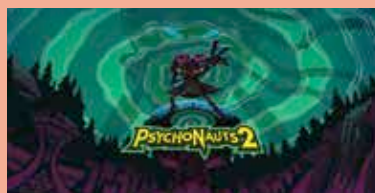

## UP AND COMING

### Humankind

Amplitude Studios' Humankind is a 4X strategy game, or a civ-like if you will, where you will rewrite the course of humanity's history on Earth. An interesting premise, worth keeping an eye out for if you enjoy grand strategy games.

**Release date – August 17**

### Psychonauts 2

More than fifteen years after the first Psychonauts, Double Fine is coming out with Psychonauts 2. Funds for the game were raised via crowdfunding, so people have definitely been waiting for this. Here's hoping it turns out to be good.

**Release date – August 25**

### New World

A new MMORPG from Amazon of all things, New World is all set to "shake up" the MMO world, with supposedly new and fresh offerings for the dying genre. We really hope it's everything they claim it will be, the MMO genre needs a boost.

**Release date – August 31**

The sunken B-29 bomber in lake mead in Fallout: New Vegas is an actual event that took place in Nevada on July 21, 1948.
