WHAT'S NEW

Xiaomi beats Samsung to be the number one phone brand

According to a new Counterpoint report, Xiaomi surpassed Samsung to be the world's number one smartphone brand for the first time in the month of June. Xiaomi smartphones accounted for a total of 17.1 per cent global market share by volume. Samsung and Apple followed with 15.7% and 14.3% market share, respectively. Considering the results of the entire second quarter, Samsung still retained its lead and Xiaomi still made it to the second position. Xiaomi has achieved this success in a short span of around 10 years. The Chinese smartphone maker has been the best selling

smartphone brand in India for a while and managed to surpass Samsung first in Europe and then globally. As the Counterpoint report notes, Huawei's decline contributed to Xiaomi's growth in the quarter. The company managed to fill the gap left by Huawei and Honor in Africa, China, Europe, and the Middle East. Of course, the lead is in terms of smartphone sales and not total revenue. <https://dgit.in/xiaomiontop>

Intel Raptor Lake-S CPU specifications leaked

The 13th Gen Intel Raptor Lake-S CPU specifications and lineup has leaked online and it looks rather impressive. As per the leak by AdoredTV, The Intel Raptor Lake-S lineup is coming in October 2022 and will compete with the AMD Zen4 architecture. Intel's Raptor lake will share the same LGA 1700 socket as its predecessor Alder Lake. The 13th Gen Intel Raptor Lake CPUs could feature powerful

Raptor Cove cores in addition to power-efficient Gracemont Cove cores. The Raptor lake CPUs will most likely have a higher IPC rating, improved frequency and better performance per watt relative to Alder Lake. The 13th Gen Intel CPUs

will feature powerful Raptor Cove cores for higher performance and a higher number of Gracemont Cove cores for delivering higher efficiency. The higher number of efficiency cores in Raptor lake will make mobile CPUs more effective in terms of battery life. It'll be a direct blow to Apple's M1 chip which currently offers one of the highest battery backups in Macbook Air and Pro.
