

THIS IS TECHNOLOGY, CULTURE AND SCIENCE WITH A DIFFERENCE, AND THAT DIFFERENCE IS USUALLY ENOUGH TO MAKE MOST NORMAL PEOPLE GO "WTF?"

This month in ALT:

The robotic companions in space movies, anime genres explained, what Dolby Atmos Music is and how it works, and the regular stuff

Discord's popular music bot, Groovy Bot, is shutting down

Groovy Bot, a popular music bot on Discord, created by a small-time developer is now shutting down. The bot pulled music directly from YouTube. YouTube issued a cease-and-desist order to shut down Groovy Bot permanently. <https://digit.in/bye-groovybot>

WHAT'S NEW

Hacker returns crypto \$600 million after the firm said please

An unknown hacker returned \$600 million worth of cryptocurrency which he stole from Poly Network Exchange when the company posted a letter on Twitter urging him to do so. In a fatherly way, Poly Network reminded the hacker that the money they stole is large enough to attract major consequences from law enforcement. They firmly stated their disappointment with the hacker by saying "it is fairly unwise for you to do any further transactions." Additionally, the firm echoed the statement "think of the children" by reminding the hacker that the money belongs to

thousands of community members, which have families and mouths to feed as well. Surpris-

ingly, the pleading and scolding worked, giving Poly Network their money back and all of us a lesson in parenting, if your child stole hundreds of millions of dollars online that is. The anonymous hacker said in an online Q&A that they aren't interested in money and only stole the money for fun. <https://digit.in/polyhack>

Some users can soon experience being in space through VR

Visiting space is something that is safely out of budget for most of us common folk. However, you can experience spacewalk via virtual reality now to see what it feels like to float around in space. Episodes 3 and 4 of the series Space Explorers: The ISS Experience will allow people to explore what it remotely feels like. In order to achieve this, Felix &

Paul Studios, one of the series' creators, customised a VR camera and attached it to the Canadarm2 robot to capture 3D, 360-degree scenes from

outside of the space station. The customised camera has nine 4K sensors that capture 3D, 360-degree images at 8K resolution. The episodes will be available sometime this year in 360-degree mobile format on 5G enabled devices from carriers in South Korea, Japan, and others, as well as Oculus Rift headsets. <https://digit.in/spaceinvr>

Check out this hilarious parody website

Beijing-based developer, Guangyi Li, created a parody website dubbed "How I Experience Web Today" that hilariously showcases some of the things one might encounter when trying to read an article online. <https://digit.in/parodywebsite>

12-year-old coder to earn more than \$400K from NFTs

Benyamin Ahmed, a 12-year-old coder, has created a collection of digital whales that are selling as NFTs. According to CNBC, the coder is on track to earn over \$400,000 from his collection of NFTs in under 2 months! <https://digit.in/whalestoriches>

Amazon working on a buy-now-pay-later option

After striking a deal with Affirm, a major player in the buy-now-pay-later space, Amazon will soon allow its customers to pay in a series of monthly instalments on purchases of \$50 and more. The company is now testing with select customers. <https://digit.in/amazonbnpl>
