

# Viewsonic M2

**U**nlike the M1, the Viewsonic M2 is not a portable projector. Well, not in the traditional sense. It comes with a nice carrying bag, but it does not run on an internal battery. You can connect it to a USB-C power bank but the projector needs a constant source of power to run. The device has a Full-HD resolution and also supports HDR. But it is priced at a whopping ₹85,000 on Amazon.in, ₹80,000 on Flipkart and ₹76,000 on TataCliq.

The Viewsonic M2 has a square design with a black top and metallic brown design on the sides. The bottom of the device has three rubber feet along with the stand to tilt the projector. The mounting port is in the centre of the bottom of the projector. The bottom also has the housing for the Wi-Fi dongle. Speaking of connectivity, we have an HDMI 2.0 port

with HDCP 2.2, USB-C port, microSD card slot, USB Type-A port and a 3.5mm audio port. There is also a power port along with an IR receiver.

Overall, the projector has a premium build and is slightly heavy, considering it's meant to be portable and has an elegant finish. Coming to the UI, the settings are conveniently divided into Basic Settings and Advanced Settings where the former has options like language, keystoneing, focus, etc. and the latter has settings like audio, light source level, power settings and more. While the UI works well for navigating the source and settings

of the projector, its smart capabilities deliver a lacklustre experience. You are better off connecting this to a Fire TV stick for OTT content.

When it comes to performance, the projector has some excellent and colours, especially in a pitch-dark room. We blew the projector upto about 50-inches screen size on the wall and the details in the images were clear. Even during the day with the curtains drawn and a little bias light in the room.

If you are looking for a compact projector to carry along with you, then you can consider this one.

## SPECIFICATIONS

**WEIGHT:** 1.32 kgs | **DISPLAY RESOLUTION:** 1920x1080p | **BRIGHTNESS:** 1200 LED Lumens | **SCREEN SIZE:** 100-inches from 9 feet | **INPUT:** HDMI, USB-C, USB Type A, MicroSD | **AUDIO OUT:** 3.5mm | **BUILT-IN SPEAKERS:** 3W cube x 2 | **WIRELESS:** Wi-Fi, Bluetooth 4.0 | **PRICE:** MOP - ₹75,999

# Xiaomi Mi Watch Revolve Active

**X**iaomi is no stranger to wearables. In fact, one might safely say that the Xiaomi Mi Band 5 is still one of the best sub-₹5,000 wearables on the market. The reason for Xiaomi's success is the same all through its lineup. Feature rich products, at a very reasonable price.

The Xiaomi Mi Watch Revolve Active is not much different from the standard version of the wearable device. You get a 1.39-inch AMOLED dial and metal case. On the right side are two buttons, 'Home' and 'Sport'. The rear panel is made from plastic and features optical sensors as well as charging points. The straps are made from silicon and are interchangeable, which is always a good thing as it allows users to replace them if they are damaged.

The Mi Watch Revolve Active is also said to be waterproof up to 5ATM. The overall build of the wearable is pretty good. It feels nice and solid. While a large display is nice to look at, it does have issues. The size does make it tough to wear while sleeping. This can be a bit of an issue for those looking for a wearable

with SpO2 tracking for sleep apnea. This also makes it look ungainly on small wrists. The plus side is that it makes it easier to read. The display is nice and bright, which makes it easier to read in bright sunlight. The AMOLED panel offers nice punchy colours, while the response rate is excellent. Swiping and other gestures were quite smooth. One key new feature of the Mi Watch Revolve Active is the inclusion of Alexa. The digital assistant works pretty much the same as it does on any Echo device and can be summoned by long-pressing the 'Home' button. In terms of calling and notifications,

the wearable is limited to caller ID and the option to cut calls. The best way to describe the Xiaomi Mi Watch Revolve Active is that it is quintessentially Xiaomi. It offers a lot of impressive hardware and features for its price, but it's not without its flaws. If you are looking for a fitness tracker in this price range, the Xiaomi Mi Watch Revolve Active will fit the bill. But if you aren't a big fan of the design, then something like the Amazfit GTS 2 or the GTS 2 Mini might fit your taste.

**PRICE:** ₹8,999
