SPOTIFY IS A PRETTY COOL APP TO EXPLORE NEW MUSIC, ALBUMS, AND PLAYLISTS, some that you may want to listen to from your father's time or even before. With more than 345 million monthly active users, the platform has been booming for the past few years. With the excellent sound quality and comprehensive music suggestions, Spotify has managed to dominate leading music platforms such as Youtube Music, Apple Music, and so on.

Although Spotify is a feature-packed app, the features may not be easy to find as some are hidden

away behind curtains. Today, we will draw the curtains for you and reveal the best Spotify tips and tricks to help you extract the most out of our services. Without any further ado, let's dive in!

SAVE MUSIC OFFLINE

In today's digital world,

data is invaluable. Spotify premium users can choose to download tracks and listen to their favourite album or music offline without investing too much data, but still having the best possible quality.

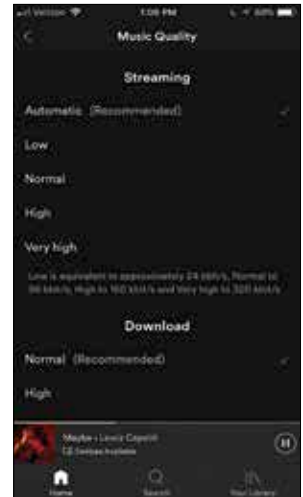

All you have to do is select download on Android devices after hitting the three-dot option and the music will start downloading. Alternatively, if you are an Apple user, select the playlist of your choice and click on the download option to initiate the downloading process.

IMPROVE SOUND QUALITY

For any music lover, sound quality is the game-changer. With Spotify, you can adjust the sound quality per your preference. Click on the settings menu; you will be open to four options, including Low (24kbps), Medium (96kbps), High (160kbps), and lastly, Very high (320kbps).

Select the most appropriate one, but remember, selecting the very high path might consume more data.

However, it's worth it for the experience it offers.

CREATE A PLAYLIST

While surfing Spotify, you can choose to create your own playlist to quickly access your favourite songs at any time. To create a new playlist into the Spotify app: Move to "Your library" in the playlist category.

If you're an Android user, click on the music icon on the top; however, IOS users will click on the "create" option to start a brand new playlist. Keep adding your favourite songs and enjoy them all together in a single go.

CHECK YOUR STATS

Another cool feature that Spotify offers is checking your stats. Go to your profile on the left and check whose music you're following the most or who's following you. This will also show your most listened albums, music, and artists.
