

TRANSFER MUSIC

What if you could transfer your favourite music or tunes from other apps into Spotify? Yes, Spotify offers you this hidden feature. You can now transfer your music to Spotify from other leading music services through the Soundiiz website. When it comes to transferring music, Soundiiz supports every possible service you would ever expect.

SEARCH AND PLAY

Do you want to find your favourite track from your own library? We understand it might be frustrating at times to keep on searching and never landing on the right music you're craving for.

With Spotify, you can move to either albums, playlists, or artists and pull down the screen to spot the search bar in the "your library" tab. Filter your options and search the track you're looking for in your own saved tracks

rather than searching for it in the entire Spotify library.

SPOTIFY DESKTOP APP

Want to listen to tracks on your work computer but you're not allowed to install the software? Well, no problem. You can now freshen up your mood at work by heading to play.spotify.com and listening to your favourite artists and albums without actu-

MASTER KEYBOARD SHORTCUTS

Clicking and pausing using the cursor can sometimes be frustrating at times, especially when you're at work listening to your favourite tracks. You can now control Spotify using your keyboard! Yes, you heard us right.

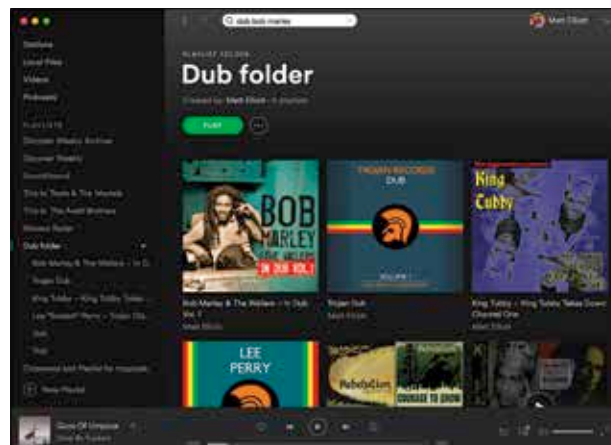

The space bar on your keyboard is play and pause. To switch onto the next track, press control right and control left for the previous one. Volume is controlled up and down. Also, if you wish to create your own playlist on the Spotify app, press control-N, and you're done.

ADD MUSIC TO SPOTIFY

Is your favourite artist not present on Spotify? Or are you missing out on artists that are not present on

ally installing the Spotify desktop app. How cool is that, right?

Spotify? Not anymore as you add them by yourself. Go ahead by clicking on the Spotify "Preferences" on the desktop app, search "Add a source," tap on it/ Now, go ahead and select the folder that contains all your favourite music. You can spot them under the label "local files" in your Spotify library.

FOLLOW YOUR FRIENDS

If you think some of your friends have great music taste, you can choose to get some music inspiration from them by simply following them on Spotify and enjoy what they enjoy when it comes to music. By following them, you can record their actions, check on their song suggestions, and see if you like them.

In case you find their choices impressive, make sure to suggest these further to your friend to amplify their experience on Spotify. To find your friends on Spotify, click on the 'Find friends' option and instantly spot your friends to expand your music taste.

USE SPOTIFY CODES

If you like to share your choices with your friends, Spotify code is a hidden gem. Using the Spotify code, you can share your playlist with others and vice-versa.
