

To download a tune, scan a code on your friend's phone or import a code that the artist itself posted.

These codes can be scanned through posters, billboards, and flyers. Click on the context menu, and a Spotify code will pop up at

the bottom of the album. You can easily choose to scan it through your phone's camera.

COLLABORATIVE PLAYLIST

Are you the music planner at your friend's bachelorette party or your brother's wedding? You can choose to make a collaborative playlist with others so you don't have to take

up all the responsibility by yourself. Right click on the playlist name, and it will open up multiple options, including a collaborative playlist option.

You can grant your friends and family access to your playlists. They can add it to their favourites so you have a wide variety of music in your playlist.

FILTER OUT CHAFF

Definitely, you may want to hear some of James Brown's favourite compositions; however, you don't want anything from his lost era. How do you filter that out? Well, it's a pretty easy job with Spotify as you can filter out a particular era that you're aren't interested in.

All you have to do is type the name of the artist in the search bar and the years you are interested in without any spaces. Spotify will then filter out your needs and will present you with everything that you expect. Pretty nifty!

VOICE FEATURE

What if you don't have to use your hands to switch onto the music or to click your favourite track to change it again and again?

Well, it's possible now with Spotify as Spotify has newly introduced the voice feature.

All you have to do is, connect your Spotify to your Alexa app and start to com-

mand. For example, 'Alexa, play James Brown songs on Spotify,' and that's it. There is no need for the hassle of switching songs over and over, instead just stream your favourite ones using voice commands.

LISTEN IN UBER

Another hidden feature that might attract you to Spotify is connecting Spotify to your Uber app to listen to your favourites while traveling to your destination. There are times when you absolutely cannot stand the songs your Uber

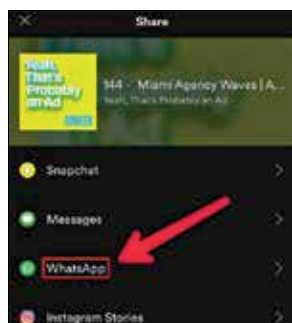

driver plays, and that's when you want to take charge.

You can take control of the music while in Uber, assuming that your Uber driver permits you to do so. Who knows, your driver might love your taste in music too!

SHARE SONGS INSTANTLY

Are you one of those people who love to share their

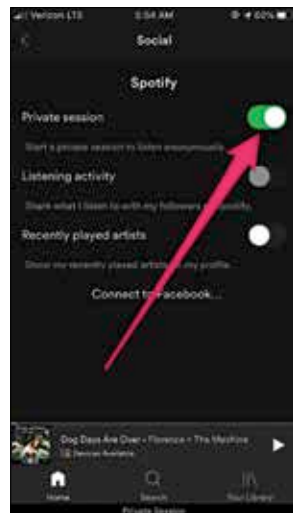

choices with others? Well, you can do this with songs on Spotify. To share a song with your friends or family, all you have to do is, click on the

three dots that you will find on the top, then click on the share icon and send it directly to your friends through social media sites including WhatsApp, Instagram, Facebook, and so on. Apart from sharing, you can choose to copy-paste the link to the song.

PRIVATE LISTENINGS

Not everyone is comfortable listening to songs that are unconventional or guilty pleasures, maybe, in front of others. If you want to keep song choices private, we have got you covered.

Click on the settings option and click private session to hide your most preferred songs from the world. iOS users will have to go the settings option, then click on social, and finally, private session to hide their music choices from the world.

SWITCH TO PODCASTS

Over the years, podcasts have become everyone's favourite pastime as you get to learn endless things while listening to the podcasts, and above all, it's fun to hear people just talking. However, the good part is
