Shang-Chi becomes 2021's biggest blockbuster so far

Marvel's Shang-Chi and the Legend of the Ten Rings passed Black Widow to become 2021's biggest blockbuster in the US box office so far. Black Widow, which premiered in July, earned roughly 183.5 million USD in theatres since its release. Shang-Chi crossed this number and topped the US box office this year. Additionally, the film also crossed over 360 million USD worldwide. Shang-Chi is the first Asian superhero movie

debut from Marvel Studios and stars Simu Liu in the titular role. The movie is also doing pretty well critically. It scored 92 percent on the Tomatometer on Rotten Tomatoes and is sitting on a 7.9 rating on IMDB. The film is one of the first Disney block-

busters to get a theatre-only release during the pandemic. Its excellent performance also encouraged Marvel Studios to release the rest of its 2021 slate in theatres exclusively. Unfortunately, since theatres are still closed in some parts of India, many fans won't be able to enjoy this film on the big screen. However, the film should release on Disney+ Hotstar but we're not sure how long that will take. <https://dgit.in/shangchi>
