Hi Team Digit,

I was first introduced to digit from 2016 when I was just 7 and I always found this magazine very interesting. So here's my feedback:

- As now we have four different sections named Tech, Cult, Sci and Art in the magazine + Cover Story. Instead there should be 5 sections + Cover Story. The fifth one should be Auto section for automotive. You can cut the back talk or feature pages to fit this small section.
 - The memes should be 2-3 page and Digit diary should be a 1 page thing.
- Thank you,

—Mehar deep Singh

Hey Mehar,

Thank you so much for your letter. We're always happy to hear from our young readers, feedback is always welcome regardless of your age, so thank you for writing in. :)

Regarding your points, the sections are pretty flexible, so you never know, we might just put auto back in there some day. It would help if more people wrote in asking for it, so ask your

friends to write in too. As for Diary and the memes, we might look into it, but it's not content everyone enjoys or reads the magazine for, so we need to be mindful about that.

—Manish

Dear Digit,

I really love the magazine and have been reading it for a long time. I am at present in a seminary undergoing priestly formation. Since I am in a seminary I am only allowed to use my phone once in 2 weeks for 2hrs. Hence I have limited knowledge of the technological changes outside. But, as print media is allowed with prior permission, I am happy to say that I am truly ahead of the times all because of Digit. I truly love the editorials as the sum content of what is happening in the world is presented in its best. The articles, reviews and news are superb. As a game enthusiast what I look for most is Skoar as I get to plan which games to play during vacation. It is just great and I am happy that you included it in the magazine. I and my fellow brothers thank you and pray for your success and well being.

—Cristy Thomas

Hey guys,

I have been following you from past 10 to 12 years and I have purchased around 80-85 digit magazines till date.

I really love your articles and I will continue to contribute more in your growth.

It's 2021 in now its a time to release your app for all news. I personally feel that you are very behind of Google news and other tech news.

You can make a quick app like inshorts so it will be easier for us to get the updates.

Thank you

Regards,

—Shantanu

Hey Shantanu,

It's great to hear that you've been subscribed to us for so long. 80-85 Digit magazines is quite a collection! Do send us a photo of yourself with them and we'll try to feature it in the magazine!

As for the app, it is something we have considered doing but haven't gotten the chance to yet simply because of the lack of time. We operate with a very small team, but we will look into this in the future.

Thank you so much for your kind words about our articles as well.

—Dhriti
