THIS MONTH IN TECH: Check out some decentralised apps and then learn about the Origins of heatsinks. Level Up with Darkroom and Skitch and learn all about AR filters in our SparkAR Workshop

Jio Tablet and Smart TV rumoured to launch next year

Reliance Jio will reportedly launch a new Tablet and a Smart TV in 2022. While the exact price isn't available yet, these new products are also likely to be competitively priced to help the masses transition to Jio's smart connected ecosystem. <https://dgit.in/jiosmart>

WHAT'S NEW

Apple reveals Self Service Repair program

The unthinkable has happened as Apple wants its users to repair the iPhones they own starting with this year's iPhone 13 and last year's iPhone 12. Dubbed as the Self Service Repair program, it'll allow users to access "genuine Apple parts and tools." In its initial phase, the Self Service Program will allow users to repair their iPhone by providing them with the necessary parts, tools and manuals. Furthermore, users can only perform repairs or replacements on commonly serviced parts like display, camera and battery during the program's initial phase. Apple said that it will allow additional repairs on iPhones

next year. The Self Service Program will also extend to Macbooks featuring M1 chips in 2022. The Self

Service Repair program will have three major steps – first, the users will be prompted to review the repair manual. Users can then place orders for Apple genuine parts online and perform the repair. Customers who return their damaged parts back to Apple will get credit for their store purchases.

Parag Agrawal appointed as new Twitter CEO

Twitter founder Jack Dorsey has quit the micro-blogging platform, he announced via a tweet. Twitter was launched back in 2006 and throughout its 15-year run, has become one of the most popular social media platforms that people use today. Jack announced that he is resigning as Chief Executive Officer (CEO) and CTO Parag Agrawal has been unanimously appointed by the Twitter board to helm the company. Jack will

stay onboard until the end of his term. Talking about his decision to leave Twitter, Jack wants the company to "break away" from its founders. Speaking about Parag, Jack said, "The board ran a rigorous process considering

all options and unanimously appointed Parag. He's been my choice for some time given how deeply he understands the company and its needs." Parag was born in Mumbai and graduated from (IIT) Bombay. He later moved to the US and holds a PhD from Stanford University. He joined Twitter as a software engineer in 2011 and has been the Chief Technology Officer (CTO) at Twitter since 2017.
