software, which can help you start or enhance your gaming experience on a Linux based machine. They sport an expansive Wiki, which has information about topics like tech support, driver detail extraction, a list of free GNU/Linux games, etc.

MAC GAMING - R/MACGAMING

If you're someone with a Mac but are a gamer at heart, then you would be a welcome member in the r/macgaming subreddit. Here, you will find a group of people who are firm believers in the idea that Macs can be decent gaming machines and have hence built a thriving community of their own.

If you have issues emulating your game through Rosetta or are unable to run a seemingly compatible title using Parallels, then look no further. Members of this community will have an answer to all your queries, and some people might be able to give you valuable advice, helping you increase the FPS and overall performance of the games that you are already running.

This community has come more to life after the launch of the M1 Macs because they have the capability of running games that no Apple user could imagine before.

BUILD A PC - R/BUILDAPC

Continuing on the theme of personal computers, we have the Build A PC subreddit. Their tagline is "Planning on building a computer but need some advice? This is the place to ask!" While you may be able to scrape up some advice from any of the previously listed communities here, apart from r/consolemasterrace, but this is where the masters reside. There are several active discussions about a range of topics, from the global GPU shortage to just simple things like differences between 1080p and 1440p display resolutions.

With over 4.6 million members and close to 3,400 active members at the

time of writing, it is just a matter of time before you post your problem and there are solutions lined

up. The homepage has a discussion thread labelled 'Simple Questions', which has an updated list of all the frequently asked questions.

MECHANICAL KEYBOARDS - R/MECHANICALKEYBOARDS

Click click clickity click. Come to r/MechanicalKeyboards for all the Click and None of the Clack! This is an extremely fun yet niche subreddit where all the mechanical keyboard aficionados flock to talk about and flex their latest and greatest, and sometimes, custom-built mechanical keyboards.

Every single one of your questions about where to get one from, which key type to get, what lubricant or damper to use can be answered here.

Owining to how long this thread has been active, you may be surprised to know the number of times the almost million members of the subreddit might have asked the question that you have. There is nothing like a small or insignificant issue here. Everyone is ready for help, and the community as a whole stands up to answer everything that you would ask or need to become the mechanical keyboard guru of your group of friends.

DAILY PROGRAMMER - R/DAILYPROGRAMMER

Dailyprogrammer is about challenging programmers of all skill levels with weekly programming challenges. Three challenges a week are posted at increasing difficulty. As mentioned in their wiki, "Solutions are peer-reviewed, and Redditors can ask for the community for feedback and comments." So, if you want to refresh your programming skills or put them to the test, come here.

There is something for everyone, using every language. The challenges posted on Mondays are in the

easy category, ones on Wednesday are in the intermediate category and the challenges on Friday are the hard ones. There are no bounds, and you are welcome, even if you are just familiar with programming Hello World! in at least one of the programming languages.

Even if you are a total beginner with no prior programming experience in any of the languages, even then, you will find a place here. If you are an experienced programmer but are starting out in this community, make sure to read the solution submission guideline to make sure that you are not flouting any rules while presenting your wisdom in front of this 226k member strong community.

TALES FROM TECH SUPPORT - R/TALESFROMTECHSUPPORT

Every single one of us, in our journeys through the tech world, may have come across some instances where people on the other end of the tech support helpline would have brought forth certain situations, that are worthy of being narrated in a gathering. But, finding a gathering where your geeky experiences from tech support would be as fun for everyone as they are for you could be difficult.

This is the place where you can find that gathering. Come here, vent out, share your stories or read what others have posted, and get entertained. This is like a geek's standup show, with the only catch being you will have to read through stories to have your share of fun in this subreddit.

But, this subreddit has a great collection of stories, which we can vouch for, and math would too. Out of the 726k members, and the stories that they have posted, we are sure that just by the virtue of probability, if not anything else, you would find something of your interest, or an audience that is interested in what you have to say. 📖
