■ Running Scripts Easily

To remove preinstalled apps, it includes some nifty scripts that you just have to select and press a button to run. It includes tasks like bypassing edge from being the default handler of web services, removing default apps and cleaning windows of useless storage.

O&O SHUTUP10++

Windows gives you full control over data telemetry and unnecessary functions, giving you full control over which functions you want to use and when the data sharing goes too far.

CUSTOMISING WINDOWS 11

BRINGING BACK THE OLD CONTEXT MENU

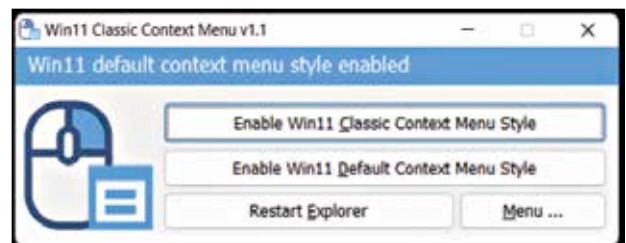

Let's face it. Nobody likes

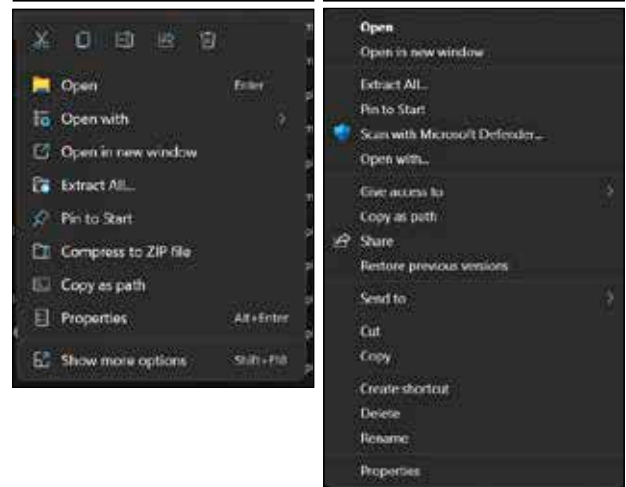

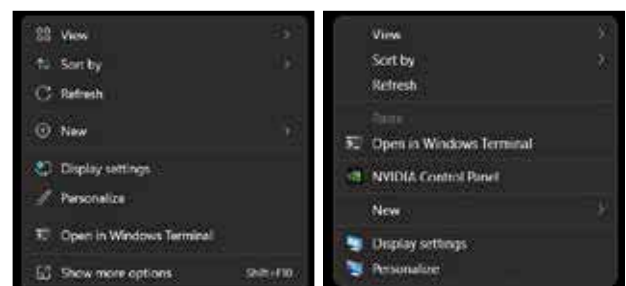

the new context menu that the Windows 11 update brings. It's just bloated and it's Microsoft's way of pushing its features over 3rd party apps' features. A simple and the best example of this is that Microsoft does not allow 3rd party apps in the main context menu. Hence, a simple right click isn't gonna bring the functionality like Windows 10. You need to click on "Show More Options" to get the FULL context menu.

We were tired of doing that and we just did not want to make it a muscle memory to click for the second time. After all, the less clicks, the better, right? Well, fortunately, some talented developers thought about this too and decided to do something about it. Head on over to this website (Download Win11 Classic Context Menu v1.1). The zip file will begin downloading automatically. Once it's done downloading, extract it into a folder.

Run the "Win11ClassicMenu.exe" and choose the style and formatting of the context menu to your liking. Remember to click on "Restart Explorer" so that the changes are reflected instantly.

Here's a side by side comparison before and after applying the "Classic Context Menu" option.

TINKERING WITH THE TASKBAR.

In our time with Windows 11, we have developed a love-hate relationship with the taskbar. At first, we hated it. It was just too drastic of a change from the humble and simple Windows 10 taskbar.

If you're a classic Windows fanboy, you will NEED to have the icons aligned to the left. Well, thankfully it is really easy to do. If you
