Attack On Titan Final Season Part 2

Unless you live under a rock, you know of this one. If you are just venturing into anime, this is possibly one that will be recommended to you the most by anime lovers. The first half of the finale series already left fans wanting more and eager for the next half. The basic plot of the anime revolves around man-eating abominations dubbed "Titans" threatening humanity. However, the humans decide to retaliate and take their lives back into their hands. If we say anything more, we'll have spoiled it for you, so we won't. You don't have to wait long for this one, it's set to release on January 9, 2022. The only downside is that this is the final season of the show.

Uru In Blue

An anime film that was shelved in 1993 due to financial reasons and the lack of profit made by anime films back then, is now finally going to see the light of day. It was the sequel to the 1987 film Royal Space Force: The Wings of Honnêamise which followed a group of pilots. Rumours have always floated regarding the

movie given the hype and the waiting period attached to it. The production of the film was announced back in 2013. It was transferred from Gainax to Gainax, a different organisation that announced the release of the film worldwide in 2022. The film may be a lot different than what was perceived and planned back in 1993, given that it has changed production houses, yet it's one to look out for.

Cyberpunk: Edgerunners

Cyberpunk: Edgerunners is a spinoff of the CD Projekt Red video game Cyberpunk 2077, but can be watched without having played the game. The

story will take place in Night City. The 10-episode series revolves around an all new character – a street kid who struggles to survive in a technology-obsessed world by turning into an Edgerunner also known as Cyberpunk. The anime series will be directed by Hiroyuki Imaishi and will feature music from Silent Hill composer Akira Yamaoka. Trigger studios, in their announcement video, mentioned it as a special project for their 10th anniversary, so expectations are high. The series will be available to watch on Netflix, and that's about it for what we know about it so far.

The Orbital Children

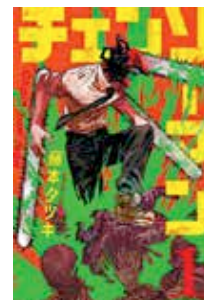

who were born on the moon. They meet Taiyo, Mina, and Hiroshi, three kids who came from Earth to space

The Orbital Children is a two-part Japanese anime sci-fi film. The plot is set in 2045 and it revolves around two children named Touya and Konoha

and now have to try to survive on a stranded space station after an accident. The Film is divided into 2 parts and will be released on Netflix with part 1 scheduled to release on January 28, 2022, and the second part scheduled for release on February 11, 2022. It comes from the brilliant mind of Mitsuo Iso, who has been widely regarded as a somewhat hidden gem for his previous work.

Chainsaw Man

Chainsaw Man is an incredible blend of dark fantasy, satire, gore and horror with a plot that is more than what meets the eye. The anime revolves

around "Devils" who feast on human fear. Our hero Denji, who is a devil hunter, meets a chainsaw devil and enters into a contract with him. The agreement sees him acquire chainsaw arms, chainsaw legs, and even a chainsaw head! The series is wicked and dark. Amidst all the blood and gore, the series will also pull at your heartstrings. Given how well the manga itself was received, we have some high expectations from the anime adaptation. The release date is yet to be announced but it has already been a fan favourite since the release of the official trailer. No official statement about the streaming platform has been made but rumour has it that Netflix might stream it for general public viewing.

Be it at the theatres or your couch, 2022 sure has a lot of sci-fi movies and series for us to enjoy. One list is not enough for all the action-packed movies that are set to be released. Do note, the release dates mentioned in the article are subject to change (Covid, you see). But hopefully, they release on schedule. What sci-fi movie or anime we listed are you most eager to watch? Let us know by writing to us at editor@digit.in.
