

Lenovo ThinkPad Plus

The laptop manufacturing giant, Lenovo at CES 2022, announced their Gen 3 ThinkBook Plus, along with other latest and greatest laptops

in their lineup. Winner of the CES Innovation Awards this year, the laptop will be loaded with a huge 17.3-inch display, with another 8-inch screen being present on the right side of the keyboard. The laptop will have the latest 12th Gen Intel Core processors. Despite all the screen additions, the weight of the laptop is limited to being just under 2 kilograms. In terms of connectivity, the laptop would come loaded with an HDMI port, a Thunderbolt 4 port, a USB C 3.2 Gen 2 port, a USB 3.2 Gen 1 port and a single Headphone Microphone Combo jack.

Razer Project Sophia

Capturing headlines from Razer's announcements at this year's CES was their Project Sophia. Placed to be the key to levelling up any home setup, this futuristic visionary computer by Razer, Project Sophia, would have as many as 13 separate modules, which would allow every user to add their own taste and functionality to the machine.

The VP of Growth at Razer, commenting on this futuristic piece of computing technology, said, "The hot-swappable modular system allows users to quickly reconfigure their desk with near-infinite flexibility, adapting Project Sophia not just for the task at hand, but also to the user's particular preference. This is the future of the battle station."

Samsung Odyssey Ark

Coming in with a 55-inch beast of a display was Samsung, as they announced their Odyssey Ark gaming

display. With a 4K resolution and 165hz refresh rate, the display is meant to cater to professionals and gamers alike. There was a piece of additional good news for the console gamers, as the display was announced to have a 16:9 aspect ratio and not the standard ultrawide, 21:9. It is recommended that the ones planning to buy this gaming and productivity beast must start building up their bank balance, as it won't be a particularly affordable product, for sure.

SureCall Fusion 4 Home Max Cell Signal Booster

Winner of the CES Innovation Awards 2022, the SureCall Fusion 4 Home Max Cell Signal Booster is one of the newest entrants in SureCall's line of products. Providing the highest system gain its class, the Fusion 4 offers maximum indoor coverage and makes sure that uninterrupted data streams are sent to each part of the intended area of coverage. The device is compatible with all the available 4G and 5G devices and currently has support for all the North American cellular carriers. With working from home becoming an integral part of people's lives all over, enough support for overseas carriers could bring up the export numbers of this device outside North America.
