

down menu that opens, click on the quote graphic option. You will then be taken to a workspace with all the tools that you need to make the quote graphic. Choose the dimensions of the photo that you want to create by using the start from scratch option, or start with a photo of your liking, or choose from the presets provided inside the software.

Once that is done, you can start making the changes and edits. The option cluster in the bottom right corner of the window, with options like background, text, styles, and animate, lets you add additional customisations to your quote graphic. Within each of these options, there are other options and tweaks which you can alter to fit what you need.

After you have made the edits to the quote graphic, you will have three options, share, save, and done. If you want to post your photo on Twitter or Flickr, click on the Share button located in the top right corner of your screen. If you want to continue editing the photo, then click on the done button, and you will be taken to the editor, where you can make further changes to the photo.

MAKE MOVING IMAGES

Photoshop Elements 2022 has a feature that lets you add moving overlays to your

picture, to give them a new definition. You can add all sorts of different overlays to your images, and create pictures, that you never thought you could create.

To add a moving overlay to your picture, open the photo that you want to edit. Then go to the top menu bar of the application and click on the enhance menu option. You will be greeted with a dropdown menu with a variety of options. At the bottom of that menu would be the moving overlays option. When you click on it, a moving overlays workspace will open, and you will be greeted with a host of overlay options to add to your image. Note that there are different categories of overlays, which can be accessed using the dropdown menu located on the top right side of the window. There are three main categories, namely, overlays, graphics, and frames. All three have a different selection of overlays for you to choose from.

Identify the overlay that you want to add to your image, and simply click on it to add it to your photo. Once the processing is done and the overlay is added to your photo, you can change the dimensions of the overlay and the opacity, too. You can also tweak the overlay using the refine overlay button present in the overlay menu on the

right side of the screen. Once you are done, click on the export button, and you will be presented with the export options menu, using which you can save the image.

CREATE CUSTOM SLIDESHOWS

PowerPoint presentations look good only in board and meeting rooms. For any other occasion, you need something special, something more than a collection of photos fading in one after the other. Adobe

the desired song in the audio library, click on the + sign that appears when you hover your cursor over the song listing, and you will have that song in your slideshow.

FINE-TUNE FACES

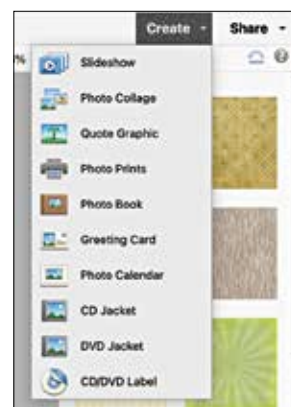

Ever had a photo where the one person, despite being instructed a thousand times to look into the lens, is lost in their own world and looking somewhere else, only for you to realise that there's nothing that can be done when you

Photoshop Elements 2022 lets you create just that.

To create a slideshow, simply select the photos from the album or the folder that they are placed in and click on the button labelled slideshow in the bottom toolbar of the Organizer. You can also create a slideshow by clicking on the create button in the top right corner of the editor window. A few processing moments later, you will be presented with a slideshow containing the selected pictures. You can adjust the theme and audio of the slideshow from the menu bar on the left margin of the window.

The audio settings also allow you to add your own song to the slideshow. All you need to do is open the audio menu and click on the button labelled with. Select the song that you want to add from a location on your computer. Once you have
