

PDGO

Funding: US\$ 7,270 pledged of US\$ 4,982 goal

Link: <https://dgit.in/pdgo>

PDGO is a unique portable power bank with a built-in 1080p display. It is a compact yet powerful USB-C charging bank that allows you to fast-charge devices while also using the built-in screen as an external display or a mirror screen. Weighing merely 220g, the PDGO features HDMI, USB and Type-C ports that can charge a variety of devices. Some of the use cases mentioned by the company for the in-built screen include using it as a larger screen for your GoPro,

using it as an SLR viewfinder while charging your camera, and a few others. It is a 100 percent sRGB display, according to the company. As for the power bank aspect of the device, the PDGO comes with 100W PD and a 10,000mAh battery. The company also claims that the power bank can charge and work as a screen simultaneously without ever going past 40-degrees Celsius. The company claims that the device is compatible with several devices such as Windows or Mac, iOS or Android phones, SLR or conventional cameras, GoPros or DJI Osmo action cameras, and Xbox or PSP gaming consoles. The power bank is being crowdfunded on Kickstarter and the Early Bird Pledge is priced at \$180. The device is expected to be shipped in April 2022.

Nebula Cosmos Laser 4K

Funding: US\$ 2,610,927 pledged of US\$ 50,000 goal

Link: <https://dgit.in/nebulacosmos>

Anounced at CES 2022, the Anker Nebula Cosmos Laser 4K projector is now being crowdfunded on Kickstarter. This is a compact, portable 4K projector that is expected to start shipping in March 2022. This device boasts Wi-Fi connectivity, built-in 30W speakers with Dolby sound, and pre-installed Android TV 10. With Android TV 10, you can get access to multiple entertainment apps such as Disney+, Netflix, and others. It also comes with an ergonomic handle that makes it easy to carry around, be it around your house or outdoors. Anker is touting this device as the 'world's most compact 4K laser theatre'. As the nomenclature suggests, the projector can output 4K UHD (3,840 x 2,160) content and it supports HDR10 as well. The projector also utilises ALPD 3.0 technology to maximise efficiency. The company claims that the Nebula Cosmos can create up to 150-inch images (diagonal) at 2,400 lumens from 13.85 feet away, which is ridiculous for such a compact projector. It also comes with autofocus and auto keystone correction. The projector doesn't have an inbuilt battery though, so you will have to plug it into a wall outlet or a portable power station. The device is powered by the ARM Cortex-A55 processor and Mali graphics unit. You get 2GB of RAM alongside 16GB of internal storage. The projector also comes with Bluetooth 5.0 and dual-band Wi-Fi connectivity.

G-Case

Funding: US\$ 157,301 pledged of US\$ 20,021 goal

Link: <https://dgit.in/g-case>

You may find many protective cases for the Nintendo Switch in the market, but, chances are, you won't find one quite like the G-Case. Following a Gundam-style theme, the G-Case does a lot more than just protect your Nintendo Switch or Switch OLED. First off, you get a modular 5,000mAh battery built into the case that can add up to 5 hours of extra battery life to your Switch. The modular aspect of this bat-

tery allows users to switch it out when the existing one runs out of juice, allowing for even more hours of play time. Additionally, the modular battery can also be used to charge other devices such as your smartphone, earphones, and more. The

G-Case is also available in three interchangeable grip sizes to suit all sizes of hands; enabling users to have a comfortable gaming experience. These grip cases can even be detached from the case to combine the left and right Switch Joy-Con into one compact controller within seconds. You even get extra game slots under the grips to carry more games around with you. The G-Case promises to be one of the most functional and innovative gaming cases and it definitely looks the part. The gadget is being crowdfunded on Kickstarter now and you can pledge \$70 to preorder the base variant. Shipping begins in June 2022.
