

PDF Scanner Word Scanner Pro**(From ₹1,699/month)**

Ahh, the joy of dealing with and submitting documents. Be it, to

renew a passport, or get a new drivers license, or even when you need to start a new job. You can't get away with dealing with them. But you can certainly make the process easier thanks to PDF scanner Pro. What this app does is essentially turn your iPhone into a portable document scanner. You can use it to make digital copies of all your essential documents and make the tedious process of submitting physical documents easier by doing it online. It may not work for a lot of government processes, but with most things going online, that too should be there soon enough.

WINDOWS**eReader (₹209)**

So you're an avid reader huh? While having a room full of books might be a fabulous idea and some-

thing that most of us aspire to own, the harsh reality is that real estate is very pricey. You know what isn't that expensive though? Your PC's hard drive! You could fill it up to the metaphorical brim and still have more books on it than you can possibly read in a lifetime. And you know what else you're going to need if you go that route? An eReader that not only lets you read ebooks but also helps you manage your massive ebook collection. Oh, and this eReader can open pretty much all the popular formats ebooks come in. This includes formats such as PDF, EPUB, Kindle (MOBI and AZW3), TXT and a more. If there's an ebook format out there, eReader can open it.

Diarium - Journal Diary (₹434)

Tracking your life has never been easier thanks to technology, and with this app, you can

take life tracking to a whole new level. Diarium - Journal Diary lets you keep track of pretty much everything. And the best part is, it does most of the tracking automatically as it can sync up with a bunch of other apps such as your system calendar, social media apps, and fitness-tracking apps. It will also encourage you to manually write down memories by notifying you every day and you can also attach pictures, audio recordings, tags, people and locations. Basically, it creates a timeline of your life to revisit anytime you are nostalgic.

Duplicates Cleaner Prime (₹324)

We have all been there. One day you decide to ignore your trusty file management system to

temporarily save files in a location it shouldn't be and before you know it, you have a horde of random files and folders you have no control over with a ton of duplicates and triplicates all across your hard drive clogging the bowels of your storage memory. Although we may not have a solution to all those problems, we can recommend an app that can help you out with all those duplicates. Duplicates Cleaner Prime makes finding and deleting all those pesky duplicates on your system easy which results in more efficient utilisation of storage and more efficient file management as well.

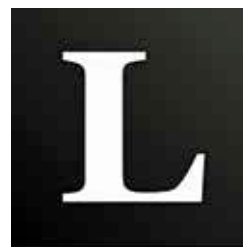

HD Movie Maker - Pro (₹824)

This app is one of the best-selling apps on the Microsoft Store and as the name suggests, it is used to edit videos. Unlike many other video editing apps, HD Movie Maker - Pro

can be used by beginners and advanced users and has a wide variety of features and functions such

as transition effects, superimposed text, trimming videos, photo overlays, stabilisations and much more. It also supports a variety of video resolutions and can edit videos with a max resolution of 4K at 60 frames per second. The easy to use UX and beginner-friendly interface make it a useful tool to get started and learn the basics of video editing.

Leonardo (₹2175)

Fair warning, this app does not have anything to do with the guy from The Wolf of Wall Street.

But it does have a lot to do with another famous Leonardo. Named after the famed renaissance artist extraordinary, Leonardo, is a drawing and painting app, but for Windows devices. It has been specifically designed to work well with the Surface family of devices, Wacom slates and other Windows devices with touch screen functionality. One of its key features is that it offers an infinite canvas to draw or paint on. So your creations could be infinitely detailed as well. Next, is its well-designed and easy to use interface that can scale to any screen size and apart from drawing and painting, the app can be used for tracing, as a whiteboard, creating flowchart processes and brainstorming new ideas.

That's about it

There is always an app for anything that you can think of. And these were just 15 of them. So, FOR THE LOVE OF TECH, make sure to fully utilise and explore the vast and fascinating technological marvel of a world we are living in today.
