S

uperhero movies are always a crowd favourite. A genre that unites all age groups, Spider Man: No Way

Home still grossing only confirms it. 2022 has a lot of superhero movies in store brought to you by the Marvel and DC cinematic universes. Whichever of these universes you belong to, you are in luck, there are a lot of movies for you to look forward to.

DOCTOR STRANGE IN THE MULTIVERSE OF MADNESS

March 25, 2022

Five years after the release of Doctor Strange, Benedict Cumberbatch's Stephen Strange gets a sequel with Doctor Strange in the Multiverse of Madness. It has already become the most anticipated movie for the year 2022.

It follows Dr Stephen Strange as he keeps on investigating the Time Stone and also deals with a recent friend turned foe who is out to destroy every sorcerer on earth. Scarlet witch will play a major

Christian

eagerly looking out this rendition to find out who rules Wakanda next, however, it sure will be a bittersweet ode to Boseman and his legacy.

BLACK ADAM

It's Dwayne "The Rock" Johnson's world and we are just living in it. The Rock finally gets his chance to channel his inner superhero with the arrival of DC's Black Adam. This film takes another DC villain character and puts them in the limelight, giving them the story they deserve. The character is Shazam's most despised enemy, who draws his powers from a similar
