

Loewe bild s.77 Special Edition

Loewe is well known for its prowess in the luxury A/V sector for their high-end TV's and other AV paraphernalia. But with the bild s.77 Special Edition TV, Loewe might just be pulling out all the stops when it comes to exclusivity. So, let's get to the point and explore what makes this 77-inch TV so special. Well, firstly, this TV is a Special Edition, meaning only 99 of them will ever be manufactured as it's a celebration of Loewe's 99 years as a brand. And they also have real gold-plated badges engraved with the edition number. For those not familiar with the look of Loewe TVs, most of them feature a ring on the front, under the display, which in this case, is gold-plated as well. Apart from that, it features everything you'd expect from a high-end TV, like a behemoth 77-inch 4K display supporting HDR 10, HLG and Dolby Vision. It also has an SX Quad Core Processor handling the image processing. The party piece of the TV though has to be the soundbar that is revealed only when the TV is turned on thanks to a unique mechanism that lifts the TV up.

Louis Vuitton Tambour Horizon Light Up

You might think that the latest in the line of Apple Watches, with their hefty price tag, may be the last word in luxury when it comes to smartwatches. But smartwatches are yet to catch up with normal luxury watches in terms of their prices and above all exclusivity. Louis Vuitton though is one step closer to catching up though with their recent launch of the Tambour Horizon Light Up smartwatch that has a hefty \$3000 (approximately Rs 2,25,600) starting price

and looks that wow. The top of this smartwatch is crafted from sapphire glass and has 24 LED lights under the glass that creates a drop-dead gorgeous glow-in-the-dark effect. It also has two buttons on either side of the crown that helps with more efficient and intuitive navigation through the

watch's operating system. When it comes to the tech, the watch features a 1.2-inch circular AMOLED display sporting a resolution of 390x390 pixels. The processing duties are taken over by Qualcomm's Snapdragon Wear 4100 SOC, featuring 8GB of storage and 1GB of RAM. It also has all the bells and whistles you might expect from a modern smartwatch like an ambient light sensor, gyroscope, heart rate monitor and much more.

Brabus 800 Adventure XLP Superblack

A Mercedes G Wagon but with the rear chopped off to make it a dual-cab pick-up truck? Purists would call it an abomination. But, to heck with the purists, because the Brabus 800 Adventure XLP Superblack is one bada\$\$ vehicle. It is based on the legendary Mercedes-AMG G63 which is already a capable luxury off-road car and Brabus has managed to turn the bada\$\$ factor of the damn thing all the way up to 11. Its 4-litre twin-turbocharged V8 engine produces 800hp that is capable of propelling this hunk from 0-100 km/h in a blistering 4.8 seconds. It also produces 1000Nm of torque and has a 9-speed automatic transmission which can take the Brabus 800 to an electronically limited top speed of 210 km/h which makes it one of the fastest production pick-ups.

It might have the price tag of a luxury car, coming in at an eye-watering €725,900 (approximately Rs 6.1 Crore) but it is an SUV first and has all the equipment you'd need for the most adventurous of outings. To that end, it has portal axles for improved ground clearance, Brabus Monoblock HD forged wheels, Ride Control Suspension and a remote-controlled winch.
