

FOXIN FOXFIT PRIME

The Foxin Foxfit Prime is a premium looking smart-watch. To start things off, inside the packaging, we have a magnetic charging dock, a warranty card, and a user manual. Coming to the watch itself, it features a large, circular dial. The silicon straps are textured and have decent quality as well.

Long pressing the crown turns the watch on. The watch uses Coolwear OS, and it's very clear from the getgo that the UI is inspired by Apple's watchOS. This is a pretty feature rich smartwatch, but the UI experience is slightly laggy.

Coming to the display, we've got a 1.3-inch IPS touch display with capacitive touch. It's a good looking display, and it's fairly bright as well; you should have no trouble viewing the display in bright sunlight. For the sensors, we've got a heart rate monitor, an SpO2

monitor, daily activity tracking including steps, sleep, multiple sports modes, the works. Inside, we've got a 200mAh battery with an advertised standby time of 15 days. The watch is IP68 dust, splash and sweat resistant, has changeable straps, and 6H glass hardness.

The user manual and the watch itself have a QR code for the Coolwear app. You can also simply find the Coolwear app on the Play Store. Pairing the device with the app is easy, simply turn bluetooth on and the app will find the watch. The app can be used to track your health monitoring statistics such as your sleep, BP, blood oxygen, sleep and heart rate. The device section

allows you to toggle notifications for the watch, set up alarms and reminders, music controls, upgrade the firmware, customise the watch faces and more. The easy camera option is also present here, allowing you to use your watch to click photos with your phone.

Overall, the build feels fairly robust and even premium. In about a week's worth of usage, we didn't have any issues with the watch's tracking capabilities. We found the battery performance to be pretty good, and the device charges pretty fast as well. Overall, this is a pretty solid budget smartwatch.

PRICE: ₹2,899

Michael Kors Access Gen 6 Bradshaw

The MICHAEL KORS Access Gen 6 Bradshaw is just the Fossil Gen 6 in a different avatar.

You've got the same 1.28-inch round AMOLED screen with a pixel density of 326 PPI running Android Wear and a battery that can be charged up to 80 per cent in under 30 minutes. The sensor array on the underside is also the same as what we'd seen with the Fossil Gen 6 watch. Being a MICHAEL KORS device, we see a few cosmetic changes such as the watch bezel featuring engravings at each 10-minute interval and a significant piece of the real estate is taken up by the MICHAEL KORS branding. The strap design is a bit different and the MKT5133 that we received features a rose-gold theme all over.

Since the device is built atop Qualcomm Snapdragon Wear 4100+, it becomes eligible for the Android Wear 3.0 update which is supposed to arrive for all compatible FOSSIL devices in early 2022.

The activity tracking features work just as well as any other Android Wear device. It's fairly accurate. There's even a SpO2 sensor that works decently well. We did

have some issues getting the sensor to read the SpO2 levels but it matched several oximeters that we tested. We walked about 10 kilometres with the watch and found it to track about 7-9 per cent more distance which is flattering, but we'd prefer accuracy over flattery any day. Feature-wise, we've got a great package in the Access 6 Bradshaw except for the battery. In our usage, the device would last about 13 hours without using most of the features. If you were to enable activity tracking and start answering phone calls, then the battery life drops even further. We can't wait for Wear

OS 3.0 since that brings a lot of software optimisations that will improve battery life considerably.

SPECIFICATIONS

CASE MATERIAL: Stainless Steel | **CASE SIZE:** 44 mm | **DISPLAY SIZE:** 1.28-inch Full Round AMOLED (326 ppi) | **STRAP/BRAZELT MATERIAL:** Stainless Steel 3-Link Bracelet | **LUG WIDTH:** 22 mm | **BATTERY TYPE:** Magnetic with Pin / Charge Time Approx.
