

The Digit Test Centre receives hundreds of products every month. Each of these products is put through a series of tests and is finally given a score. The final score is arrived at after considering a number of factors and evaluating them in terms of features, performance, value for money, build quality, and, in the case of software, ease of use.

For better understanding of our ratings, here's a quick guide to our overall score

|           |                                                                                                      |
|-----------|------------------------------------------------------------------------------------------------------|
| 10 to 30  | <b>Extremely poor product.</b><br>Keep away!                                                         |
| 31 to 50  | <b>Strictly OK.</b><br>Not recommended                                                               |
| 51 to 70  | <b>Decent product.</b><br>Go for it, but there may be better products out there.                     |
| 71 to 90  | <b>Very good product.</b><br>Highly recommended.                                                     |
| 91 to 100 | <b>Ground-breaking product.</b><br>We've never seen anything like it before.<br>A definite must buy! |
