Realme 9 Pro+

Buy it for the cameras!

Realme 9 Pro+ marks the company's foray into the sub-30K budget category. The Realme 9 Pro+ boasts solid features and showcases its prowess, especially in the performance and camera departments. Here's how the Realme 9 Pro+ fares.

BUILD AND DESIGN

Realme sent us the Sunrise Blue colour variant of the 9 Pro+ which has a Photochromic layer on the rear panel. The 9 Pro+ is Realme's first phone that has a colour-changing back panel that shifts from a shimmering blue colour to red when held under sunlight or UV light.

However, the implementation seems a bit off since the back of the phone is reflective which doesn't let the colour change properly as advertised.

Coming to the build of the Realme 9 Pro+, it remains pretty solid with a slim profile. It measures 7.99mm and weighs 182 grams which Realme claims is the slimmest phone in their number series yet. This phone does not feel hefty in the hand and has great ergonomics that ensure you put minimal effort while holding the phone in your hand.

DISPLAY

The Realme 9 Pro+ features a 6.4-inch Full HD+ AMOLED display that offers support for upto 90Hz. While the display supports HDR10 and even HDR10+, some of the review units seeded by Realme are not compatible with Netflix. However, Realme has assured us that the retail units will be Netflix certified. Apart from that, the display can run 1080p HDR videos with much ease and reproduces the tiniest of the details so you can be rest assured of a good viewing experience.

PERFORMANCE

The Realme 9 Pro+ is powered by the MediaTek Dimensity 920 chipset. It is being offered with upto 8GB RAM paired with upto 256GB storage. It runs

on Realme UI 3.0 which is based on Android 12. Realme has also put a vapour chamber inside the 9 Pro+ to ensure that it runs cool in demanding scenarios like gaming.

The general day-to-day performance of the Realme 9 Pro+ really impressed us. This phone showed no signs of lags or jitters in animations. In our standard testing procedure, the Realme 9 Pro+ demonstrated its performance prowess taking a marginal lead over the incumbents Xiaomi 11i Hypercharge and Vivo V23.

In AnTuTu and Geekbench tests, the Realme 9 Pro+ got better scores than the Hypercharge and V23 even though all three phones carry the same SoC. In the PCMark test which runs an intensive workload test including video editing, web browsing and more, the Realme 9 Pro+ got a great score which means it is able to handle those tasks without breaking a sweat.

The Realme 9 Pro+ demonstrated a solid gaming experience for a mid-range phone and received great scores in GPU tests like 3DMark and GFXBench.

BATTERY

The Realme 9 Pro+ comes equipped with a 4,500mAh battery that supports 60W fast charging. In our time with this

phone, the battery lasted for around a day and then some on a single charge and under basic workload like taking calls, sending a text on WhatsApp, watching videos on YouTube, listening to some music on Spotify and more.

CAMERA

The Realme 9 Pro+ gets a triple camera stack on the back headlined by a 50MP camera that uses the Sony IMX766 sensor followed by an 8MP ultra-wide camera and a 2MP macro camera.

Being a flagship sensor, Realme has been able to optimise and fine-tune the camera stack as well as the camera app making it super easy to take a good picture. During the day, the Realme 9 Pro+ is capable of taking some sharp, bright and eye-pleasing pictures. However,

the colours tend to be ever so slightly saturated. At night, the main camera does a great job of capturing light, sharpness and colours by default. Enabling the night mode boosts the brightness, clarity and adds textures. The ultra-wide camera creates decent wide-angle pictures. The macro camera, however, is

there just to make up the numbers and is a hit-or-miss affair.

VERDICT

The Realme 9 Pro+ is a great camera phone for its asking price of ₹24,999. While you may get an alternative in the form of more powerful phones like the Poco F3 GT or the Nord 2, Realme has made significant advancements in mobile photography. If a camera phone is what you desire, the 9 Pro+ will undoubtedly serve you well.
