

THIS IS TECHNOLOGY, CULTURE AND SCIENCE WITH A DIFFERENCE, AND THAT DIFFERENCE IS USUALLY ENOUGH TO MAKE MOST NORMAL PEOPLE GO "WTF?"

This month in ALT:

This month in Alt, we list out some of the coolest cars featured in James Bond films, we explore how gamification is being used for new-gen education, and more!

Blackberry 5G Officially off the market

OnwardMobility announced that the Blackberry 5G "ultra-secure" smartphones are no longer in development. They expressed gratitude for the support. 5G Blackberry smartphones were anticipated since last year, but they kept getting delayed citing different conditions. This January all support for Blackberry operating systems were stopped. With no 5G Blackberry phones, this seems to be it for Blackberry.

WHAT'S NEW

India's first indigenously developed 5G Broadband Technology

IT Hyderabad and WiSig Networks have developed 5G wireless broadband technologies indigenously for the first time. Both the companies announced a maiden 5G data call using indigenously developed 5G open radio access network (ORAN) technology. This major breakthrough will bring India to the forefront of 5G technology and beyond. The call was made using a MIMO capable base station that supports 100MHz bandwidth in the 3.3-3.5 GHz frequency band. Prof Kiran Kuchi, Dean (R&D), IITH, said these capabilities will help

India be self-reliant in designing and manufacturing wireless broadband networks. This

development will play an important role in coming generations of technology, product and services. Together they developed more than 100 5G patents, of which 15 of which are declared as 3GPP 5G Standards Essential Patents (SEPS) to Telecommunication Standards Development Society, India.

Truth Social App: Trump's very own Twitter

After getting banned on all social media sites, former President of America, Donald Trump has launched his own social media app called Truth Social. It is currently only available for iOS devices. The app is an exact clone of Twitter, instead of tweets, the posts on Truth Social are referred to as "Truths" and the feed is called 'Truth Feed'. Users can "ReTruth" any post of their liking which is similar

to "Retweeting". Some users who have downloaded the app have been put on hold due to massive demand and some

faced errors while signing up.

Since his ban in early 2021, this is Trump's second attempt at creating a social media presence. Last May, he started a blog that was shut down. Truth Social App was earlier tested in beta with around 500 users and was launched officially on President's Day. The app was developed by the Trump Media and Technology Group (TMTG). The former President has already shared his first "Truth".

'Made in India' Wearables

PLAY, an Indian brand for smart wearable gadgets, is all set to launch two new smartwatches. These made in India smartwatches are called PLAYFIT DIAL and PLAYFIT XL. Both these watches are customisable and allow users to personalise them. The PLAYFIT DIAL will be available at ₹2,999 and PLAYFIT XL at ₹3,999.

WhatsApp New Feature

WhatsApp will soon roll out the feature to keep Facebook-like cover image photos. As of now, this feature will be limited to WhatsApp business profiles as it will enhance the business catalogue. The feature is already rolled out for beta testers, but it is currently in the development stage.

Highest performance atomic clock

Physicists have created one of the highest performing atomic clocks. They named it an optical lattice atomic clock which can measure differences in time to a precision. It's designed in a way that allows researchers to search for gravitational waves and will help in dark matter theory.
