

Dyson V12 Detect

The Dyson V12 Detect Slim is a premium product that is quite remarkable at cleaning different types of surfaces. It delivers powerful suction, is very convenient to hold and has an LCD display that keeps you informed about the dust collected and remaining runtime. The laser detect sensor and piezo sensors are cool additions that add value to this iteration.

Here are all the attachments that come bundled in the box:

- Fluffy cleaning head with laser (motorised) – Suitable for hard floors
- Direct drive cleaner head (motorised) – For hard floors, carpets, and ground-in dirt
- Hair screw tool (motorised) – Effectively picks up hair, good for cleaning car seats, mattresses, car upholstery
- Combi tool – has soft nylon bristles; can quickly switch between dusting and cleaning. Good for dusting walls and ledges
- Crevice tool – to clean hard to reach crevices
- Soft dusting brush – suitable for dusting furniture and tabletops
- Stubborn dust brush – stiff nylon bristles; helps dislodge dirt from carpets, floor mats and car interiors
- 706 mm wand
- Wall dock, wand clip and charging adapter
- Up-top adaptor, extension-hose

and mattress tool are a few notable omissions.

If you are spending the premium price of ₹55,990, you might obviously be considering robotic vacuum cleaners that require minimal cleaning effort and are usually deemed good for hard floor cleaning. The Dyson V12 Slim Detect on the other hand is a versatile

tool that can be used for more targeted and intense cleaning across your entire home or your car and will be relatively more reliable when it comes to intense cleaning performance.

The Dyson V12 Detect Slim delivers powerful suction, is remarkably convenient to hold and operate, and has an LCD display that keeps you informed about the dust collected and remaining runtime. The laser detect sensor and piezo sensors are cool additions that add value to this iteration.

Garmin Fenix 7X

The Garmin Fenix 7X is possibly the best multi-sport watch you can buy right now. It can do and track pretty much anything. And on top of that, it's very accurate and the Garmin

Connect app gives very detailed information. It has a solid build, excellent accuracy and a host of activity tracking options. Additional features such as the solar panel and built-in flashlight can be genuinely useful. But, at nearly a lakh, it isn't something most of us will be able to afford. Regardless, if you want the best, money no bar, and are ok with limited smart features, then Garmin Fenix 7X Solar is the wearable for you.

If you want something more affordable, and only run or cycle,

then you could consider the Garmin Forerunner 55. It offers you excellent accuracy and all the juicy stats via the Garmin Connect app. But, you will not have to say goodbye to a number of features including a touch-

screen. If you are looking for a multi-sport watch with a pretty design, then the Fitbit Sense might just fit the bill. It's pretty and offers a nice colour touch-screen as well.

If you still want something that can handle the great outdoors but want better smart features, consider the Suunto 7 Black. And if you just want a smartwatch with decent activity tracking, then an Apple Watch Series 7 or the Samsung Galaxy Watch 4 Classic might just be the thing for you.
