rate. You may also set up FIT rules to automatically save a certain amount of money. It can set aside Rs. 10 every time you order meals from Swiggy, for example.

Overall, Fi Money is a direct competitor to Jupiter and shares many of the same features. It is now India's top neobank for foreign transactions and smart deposits, albeit it does not give cashback like the latter.

- Partner Bank: Federal Bank
- Interest Rate: 2.5%

Pros

- Free VISA Platinum debit card (with free first-time replacement)
- 0% forex markup charges
- Smart deposits, FIT rules
- Built-in expense tracker within the app

Cons

- Open only for working professionals

NiyoX

Niyo was one of the first companies in India to develop neo-banking. They began by collaborating with IDFC First Bank. They later discontinued it in favour of NiyoX, which they developed in collaboration with Equitas Small Finance Bank.

NiyoX gives a free VISA Platinum debit card for the first year, with two styles to select from. From the second year onwards, you'll have to pay an annual charge of Rs. 150 + GST. In any case, they may shortly introduce some balance maintenance criteria to exempt these fees.

Tap-to-pay is available on the newly introduced debit card, which also comes with no foreign exchange fees until December 31, 2021. After that, if you wish to avoid paying currency fees on foreign purchases, you can keep your MAB at Rs. 5,000.

NiyoX also allows you to invest in direct mutual funds from within the app (of course, we have better mutual fund apps out there). It has a unique feature called "Invest the Change," which automatically invests the spare change every time you spend.

The transactions are free, and there is no requirement to maintain a balance. Niyo, on the other hand, falls short when it comes to client service. After using it for a while, I was not impressed with the customer service or the underlying bank's stability.

- Partner Bank: Equitas Small Finance Bank
- Minimum Balance: Zero
- Interest Rate: 3.5% (for amount <1L), 7% (for amount >1L)

Pros

- Free Visa Platinum debit card for the first year only
- 7% interest rate for amounts above Rs. 1 lakh, below that is 3.5%
- Zero forex markup charges

Cons

- Provided debit card becomes chargeable from the second year
- The smartphone app is not as polished as other neobanks

Jupiter

In collaboration with Federal Bank, Jupiter Money offers a no-fee, zero-balance savings account. It was established by people you can trust,

including Jitendra Gupta, the CEO of Citrus Pay, which he sold in 2016.

You can acquire a free VISA Signature debit card from Jupiter with no joining or annual fees. It also gives 1% cash back on debit card and UPI purchases from approved merchants, as well as 5% cashback on foreign transactions (3.5% forex charges).

The app is easy to use and includes features such as checking

your net worth, which includes the balances of all your bank accounts, active loans, and a real-time breakdown of all your spending for the month.

There's also a Pots account where you can put money aside for your financial goals. It also features a helpful and responsive customer service team as well as a vibrant community. Jupiter is the greatest neobank app in India, with all of its benefits and features.

- Partner Bank: Federal Bank
- Minimum Balance: Zero
- Interest Rate: 2.5%

Pros

- UPI payments without fee
- Free VISA Signature debit card (free replacement also)
- Cashback of 1% on debit cards and UPI transactions
- Widget to track spending
- 24 x7 chat support

Cons

- Standard markup charges on international forex transactions
- IMPS transactions above Rs. 1000 free after five transactions
