5 COOLEST PIECES OF BAT-TECH

This one goes out to all the Bat-Fans out there!

Atreya Raghavan | feedback@digit.in

"Our greatest glory is not in never failing, but rising everytime we fall."

— Batman

A

h, Batman. Perhaps the original genius, billionaire, playboy, philanthropist.

(Batman first appeared in 1939, as compared to Iron

Man, who first appeared in 1963. But hey, we love them both equally! We swear!) The Caped Crusader. The Dark Knight. Or simply Bruce Wayne. A character that is known by many different names, and perhaps many different faces. He is a character that is either loved, or hated, and on some occasions, both at the same time. However, Batman as a character has managed to achieve what not many superheroes can claim to have done – ensure that his entire spectrum of fans, across generations, geographical and cultural borders, and genders, resonates with him. It is perhaps because Batman, under-

neath, just as all of us, is human. A human with his own flaws. A human with a good, as well as an evil side. Despite this, overtime he developed in him, nearly superhuman strength and endurance. Batman ensured that he could hold his own against the rest of the Justice League- Aquaman, Wonder Woman, the Flash, Green Lantern, Cyborg, and of course the all-powerful Kryptonian, Superman. A brooding genius, Batman lost his parents at a young age, and channelled that rage into something he believed in to ensure the triumph of good over evil.

The man in the unmistakable black cowl and the cape, was self taught in 126 different forms of martial arts. He furthermore trained himself in stealth movement, as well as interrogation techniques and trained himself to become the world's greatest detective. All of which he did with the help of many incredibly cool, self-developed gadgets popularly referred to as 'Bat-tech'.

And so, here are the top ten coolest pieces of Batman's equipment!

1) BATMOBILE

The Batmobile is perhaps one of, if not the coolest movie car of all time. It is what the Silver Birch Aston Martin DB5 was to James Bond, what the Millennium Falcon was to Han Solo, or the DeLorean DMC-12 was to Marty McFly. It has appeared in almost every on-screen iteration of Batman, from Batman (1943) to The Batman (2022). Over the years, the Batmobile has constantly evolved, from the Lincoln concept car of 1955, which featured as the original Batmobile in the classic TV series, to the Tumbler featured in the Dark Knight Trilogy, and the muscle-car like Batmobile to be featured in The Batman (2022). With the evolution in design, it has also featured many different gadgets, weaponry and self defence systems over the years, including- dashboard radar, emergency searchlights, geiger counter, ejector seats, a 25mm Vulcan Gun, 60 mm high power explosive penetrator shells, electroshock defence, and a multi-
