

Inferno Match, Casket Match, and the Lumberjack Match.

Aside from your standard match types, WWE 2K22 also offers different game modes. We mostly played the MyGM, MyRise and Showcase modes.

## MyGM

The MyGM mode lets you take charge of either RAW, Smackdown, NXT or NXT UK. There are five GMs to choose from. This includes Adam Pearce, Sonya Deville, William Regal, Shane McMahon, and Stephanie McMahon. You also get the option to have a custom GM.

Each GM gets unique cards that give them special abilities. For example, William Regal can hire a WWE Legend for free, while Adam Pearce can increase the rivalry level between two Superstars.

The mode sees you set up three matches. An opener, a mid-card and the main event. You can choose match types as well as set up things such as interferences. Between matches, you can also set up promos that can do anything from increase rivalry

We played a review copy of WWE 2K22 on the Xbox Series X

between two Superstars to increasing the popularity of said Superstar. You also set up where you want the match, level of pyro, and so forth. This increases the overall quality of your show. Of course. Doing all this costs money and you'll have to find the right balance in order to ensure you stay in the green. While the mode is a bit niche, it can be fun. Our only concern was that it felt pretty limited with the number of available match types and championships.

## MyRise

MyRise is WWE 2K22's take on a career mode.

You get to create your own wrestler and go through the whole process of becoming a WWE Superstar. This includes going through developmental, meeting other trainees and participating in matches. You partake in matches by talking to other people, or via your in-game social media account. Each choice you make impacts the course of your wrestling career.

The only issue is that the mode

feels slightly sterile as you don't get to roam about meeting your fellow wrestlers or exploring locations.

## Showcase

In WWE 2K22, you get to play some key matches in the illustrious career of Rey Mysterio. As with other modes, these matches will include certain objectives you will have to fulfil in order to stay in sync with what happened in those matches. At certain points in the match, there will be an in-game cutscene with Rey Mysterio narrating the events. These cutscenes also feature transitions to the actual matches, which lets you appreciate the work the developers put into this mode.

The only issue we have with the Showcase mode is that there are way too many objectives. There are 12-15 objectives for each mode and you have to go through them in order, in one go. There is no mid-save. If you mess up anywhere in between, you have to start over from the beginning.

## Roster

WWE has gone through some pretty notable changes in its roster over the past few years. Many big names have since moved to AEW. Regardless, WWE 2K22 still has a very decent selection of names to choose from. These include the latest generation of superstars as well as some notable legends. As such, no matter which era of WWE you prefer, you should find names you are familiar with.

## Verdict

WWE 2K22 rights the wrongs of WWE 2K20. It is an improvement in almost every way and makes a case towards having a longer development cycle for the series. However, things aren't perfect. The new Showcase, MyRise as well as MyGM modes are fun but feel limited. Visual Concepts have definitely created a very good game, but it isn't quite the 'Phoenix rising from the ashes' story. Nonetheless, with WWE 2K22, Visual Concepts have set a very good base from which they can build future WWE games. \*
