I'm Ping Pong King :)

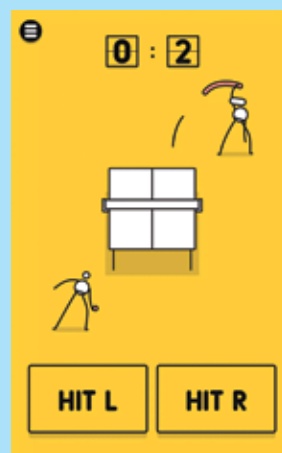

I'm Ping Pong King :) is a fun and minimalistic stickman table tennis game that focuses on simplicity and addictive gameplay. To be crowned king, you must defeat sixteen distinct opponents, each with differing degrees of skill. Ping Pong King has some few amusing features, such as the way the ball bounces about like a genuine ping pong ball, requiring you to wait longer to return your opponent's volley. If you hit the ball late, it may soar far into the air, allowing your opponent a simple return stroke. As you play more, your timing improves, allowing you to return faster volleys across the table.

To control your stickman and return the ball, simply tap left or right on the screen. Because the balls will arrive at you at different speeds, timing is crucial, and a significant amount of focus is required to win. The stickmen motions are amusing, and the basic yet clean aesthetics make it even easier to play. While there isn't a lot of content, the increasing

complexity of your opponents adds a lot of replay potential. Orangenose Studios' wonderfully tough yet hard to put down game is the perfect example of how to do a free to play right. It's always good to find a simple game like I'm Ping Pong King :) with a classy aesthetic and simple gameplay. The game's stickman art style is very well-done, and the character animations as they move and play are appropriately eccentric. It's also exciting to watch players leap into the air or reach tremendous distances to hit a ball. The game's simple style is enhanced by the developer's choice of colour palette, which helps the characters stand out. The game is free on both iOS and Android, but if you want the I'm Ping Pong King's clean design to shine through, you can pay to remove the banner adverts at the bottom of the screen.

Haunted Laia

Following the popularity of Dark Dome's Hidden Town series, Haunted Laia is the company's next offering. This Spanish company's past titles have garnered a lot of positive feedback from both players and professionals. Dark dome's successor, Haunted Laia, is all set to impress the public, gradually gaining a significant number of admirers. Dark Dome's sequel, Haunted Laia, is set in the same timeline. Laia, a little girl who debuted in Ghost Case, is the main character in the game. Laia's family visits the Hidden Town after which they are plagued by weird presences in their own home from the day they moved in, and they vanished without a trace a few days later. We assist

Laia in discovering the truth and unravelling what exactly happened and also investigating who is the mastermind behind it all. The developers' painstaking attention to detail in each of its goods shows evidently. In comparison to their past games, this one seemed incredibly simple.

Almost all of the puzzles were reasonable, and the locations of the iguanas were more obvious than not. Also, the story was fantastic. It's almost as good as Girl in the Window. It's admirable how they managed to connect various events in their games to create a lore-rich interwoven universe. Also, they do so without resorting to needlessly frightening visuals. The stunning 2D hand-drawn graphic style with a personal touch and a gripping plot about Hidden Town's mysteries make it altogether very alluring as a game. Haunted Laia is a conventional point-and-click, puzzle, and escape room game that players can quickly become accustomed to.
