WHAT'S NEW

Qualcomm chip with Cortex A710 and Cortex A510 cores leaks

Qualcomm may be gearing up to launch a new Snapdragon 7-series mobile processor this year. At least rumours of the same have started surfacing. Just recently, the spec sheet of an 8-core Qualcomm chipset leaked and it is being speculated to be the Snapdragon 7 Gen 1 SoC. The new leak has been brought to our attention by the tipster Digital Chat Station. He shared his findings on the Chinese microblogging site Weibo recently. It tells us a fair bit about the chip. This is a Qualcomm octa-core chipset with big-little core structure. This includes a cluster of 4x Cortex A710 cores clocked at 2.36 GHz and a

cluster of 4x Cortex A510 cores running at 1.80 GHz frequency. The processor is manufactured on a 4 nm architecture, although whether it is relying on Samsung or TSMC process

is not known. The other important detail gathered is that it is using an Adreno 662 GPU. Going with this, the Snapdragon 7 Gen 1 could have better or at least comparable graphical performance to Snapdragon 888 which had Adreno 660 graphics.

Apple WWDC 2022 will take place from June 6 to June 10

For the third year in a row, Apple WWDC will be held online. Well, for the most part, that is. Apple announced its 33rd Worldwide Developer Conference will take place from June 6 to June 10. On the first day, i.e., June 6th, there will be a special offline gathering of some developers and students to watch the WWDC keynote and State of Union videos at Apple Park.

On the same day, iOS 16 would be announced alongside iPadOS 16, tvOS 16, watchOS 9, and macOS 12. This year's WWDC theme is Call to Code and you can stream it on Apple.com,

the Apple YouTube channel, the Apple TV, the Apple Developer app, and the Apple Developer website. This year, there will also be more localised content for the company's global audience. There are also speculations of maybe a Mac Pro or any other Mac hardware with Apple Silicon to surface. But there isn't any concrete evidence to back them up. <https://dgit.in/applewwdc>

Google Maps gets estimated toll prices in India

Google Maps in India will show the likely toll pass prices on a route so that you can take that into consideration while calculating the cost of travel. This is among the few other features that Google has freshly added to its Maps application.
