Centre sends over 100 crore SMSes to raise cybercrime awareness

Under the Indian Cyber Crime Coordination Centre (I4C) scheme, the Ministry of Home Affairs (MHA) sent over 100 crore SMS to the citizens of India to raise awareness about cybercrimes. The MHA also launched the 'CyberDost' Twitter handle to further spread awareness of cybercrimes and their prevention. Reportedly, over 679 cybercrime awareness tips have been tweeted out via the handle. The Annual Report 2020-2021 published by MHA says that regular consultations are held among ministers, industries, academia and other stakeholders to develop effective approaches to deal with cybercrimes. A revamped National Cybercrime Reporting portal was also launched under I4C in late 2019 since the older portal only enabled the filing of complaints related to sexually explicit content.

Vivo X Fold

Vivo had its big launch event which was headlined by the company's first folding phone named Vivo X Fold. The Vivo foldable sports a book-like design with an 8-inch 120Hz 2K inner display that folds to a rather narrow form. Vivo calls its hinge mechanism 'Aerospace-grade Wing'. On the front, the X Fold presents a 6.53-inch 120Hz FHD+ screen and on the back, there is a massive round camera island housed in a rectangular panel. The camera array includes a 50 MP main sensor, a 48 MP ultrawide lens, a 12 MP portrait lens and an 8 MP 5x optical zoom periscope camera. It is powered by the Qualcomm Snapdragon 8 Gen 1 processor like any other flagship smartphone. Upon unfolding the phone, you get an 8.03-inch LTPO3 AMOLED main screen with 2K resolution, 120Hz refresh rate, and SCHOTT UTG protection. It has got a punch hole on the top right side of the inner screen. This houses the foldable's 16MP selfie camera.

OnePlus 10

The OnePlus 10 is expected to launch sometime later this year as the successor to the OnePlus 9 from 2021. Meanwhile, the OnePlus 10 Pro has already made its

way to the Indian shores. The image here shows the OnePlus 10 Pro since there aren't any images available for the OnePlus 10 so far. As per the leaked specifications that we managed to get our hands on courtesy of OnLeaks, the OnePlus 10 features a 6.7-inch Full HD+ AMOLED display that offers support for a 120Hz refresh rate. OnePlus is currently testing two chipsets for its vanilla flagship: First up, is the next-generation Qualcomm Snapdragon SoC (likely Snapdragon 8 Gen 1+) and the second one being the MediaTek 9000 chipset. It's currently unclear which chipset will end up powering the OnePlus 10. The chipset will be paired with 8GB/12GB RAM and 128GB/256GB storage options to choose from. It will likely run on the latest version of OxygenOS 12 which is based on Android 12. As for the cameras, the OnePlus 10 has a 50MP primary camera followed by a 16MP ultra-wide camera and a 2MP macro camera. And on the front, there is an upgraded 32MP selfie camera.

APP WATCH

Mastodon

Mastodon is an open-source microblogging platform like Twitter. Users can make their own profiles, post messages (up to 500 characters in a "toot"), share images and videos and follow other users.

GOGOAnime

GOGOAnime allows users to watch and download anime for free. There are a few ads in the app but most are short and non-obtrusive. You can watch both subbed and dubbed anime on this free app.

Area by Autodesk

This is a social networking platform for artists. Artists can create a profile, share their work with other budding creators and they can also store a 3D art portfolio here as well.
