

## Snap Pixy

**T**he makers of Snapchat and the Snapchat Spectacles are back at it again, and this time they have come up with a little drone called the Pixy. This drone is unlike other drones available in the market today which require some level of instructions on how to operate. It does not even have a remote control in fact. And the best part is that it is quite small. Small enough to fit in your pocket. The drone can take off and land from the palm of your hand and has

six pre-programmed flight patterns. It also has a built-in camera that can take pictures and video and send it to the Snapchat app on a smartphone. So if selfies and stories are your thing and don't have anyone to help you out with it, then this drone is just the thing for you. It can be used for short 10 to 20-second flights and a fully charged battery will give you around 8 of those flights. It also has 16GB of internal memory which is good for around 100 videos and about 1000 photos. Oh, and it is quite smart too. Thanks to the bottom facing camera it can take off and land by tracking your palm and that also allows it to track you so that you can be in the frame all the time. The Snap Pixie will cost you \$229.

## 2022 Forest River Georgetown GT7

**C**amping is all about roughing it out and being one with nature. Basically letting go of the luxuries you enjoy on a day to day basis. But what if you like the idea of camping but are too inept to live off the land to an extent where your forefathers would be looking down on you disappointed? In that case, the 2022 Forest River Georgetown GT7 is just the thing for you. What it is, is an RV a.k.a a motorhome outfitted with all the conveniences of your home. It also has four wheels and an engine so you can take it on your trips with you. That should also help with accommodation costs eh? Anyways, the Georgetown GT7 has a 7.3-litre Ford Godzilla engine producing 350 horsepower and 468 foot-pounds of torque. It has multiple floor plan options so you can pick one that is best for your purposes and can have it with multiple bed options, kitchen options and bathroom options. It also has a TV, recliner seats and everything you might need to be out in nature while still in the comfort of your own (motor)home. Starting at \$249,495, the 2022 Forest River Georgetown GT7 is sure to burn a hole in your pocket but you won't be paying ridiculous amounts for stuff you eat out of minifridges in hotels for the rest of your life so there is that.

## Hasbro and Robosen Optimus Prime

**S**o, a toy robot is too lame for you? Then how about a transforming toy robot? And what if that transforming toy robot is 3 feet tall and has a trailer of its own which can transform and has a vehicle inside of it? Ahh, we bet that has got you all interested now huh? Hasbro and Robosen have the ultimate toy for Transformers fans and that is a miniature Optimus Prime truck that can- well- transform into the humanoid version of Optimus Prime with voice commands. When in the humanoid form the toy is a whole 19-inches tall, can talk and even pose! The makers have also launched a trailer to go with the Optimus toy which can also transform and inside the trailer is a miniature 6-wheeled vehicle that can roll out of the trailer. The set also has 80 sound effects that it blasts out through its built-in speakers and is authentic to the first-generation design of the Transformer. With all this going for the set, including the lights on the unit, it would be like being on the set of one of the Transformers

movies- albeit a very small set. The Optimus Prime unit cost \$750 and the trailer unit cost an extra \$750, so that's \$1500 for a toy. But hey, if you are a Transformers fan then life doesn't get any better than this.
