Sennheiser Momentum True Wireless 3

Top-tier ANC TWS earbuds

Sennheiser's Momentum True Wireless lineup rarely disappoints, and it's safe to say that we have lofty expectations from the renowned German audio company. The Sennheiser Momentum True Wireless 3 has finally entered the cutthroat Indian audio market with a sprinkling of improvements across the board. How do these earphones perform in real life? Let's find out.

BUILD, DESIGN, AND FIT

The Sennheiser Momentum True Wireless 3 is the most premium-looking TWS earphones we've ever reviewed, period. The earphones have a shiny, metallic-textured finish that doesn't look ostentatious in any way. The charging case looks almost identical to the previous-gen models with its suave fabric material.

While the earphones look pretty svelte, they aren't as compact as competitors from Samsung and Jabra. They're definitely more streamlined than the Sony WF-1000XM4 earbuds.

One great addition to this iteration of the Momentum True Wireless earbuds is silicone wings. These are earphones we would be happy to recommend to fitness enthusiasts to use when running or gymming. The only complaint we have with the build of these earphones is that the case is on the bulkier side.

FEATURES

The active noise cancellation on the MTW 3 is excellent, no doubt. The earphones not only manage to curtail low-end, constant sounds such as an AC's hum but also significantly reduce more erratic, high-pitched sounds such as typing on a mechanical keyboard, the whirring sound of a high-speed fan and people speaking.

The Sennheiser Smart Control app is supported by these earbuds and is a great accompanying app. You get access to features such as an equaliser, sound zones, custom touch controls, and more. You can also check battery levels, perform firmware updates, and more. Now, the equaliser on this app isn't our favourite; it severely lacks EQ bands and thus, limits how much you can tune the sound.

Other features include Bluetooth v5.2, Qi wireless charging, and IPX4 rating. While these are definitely one of the most feature-laden earphones we've tested, they miss out on multi-point connectivity.

PERFORMANCE

Equipped with 7mm TrueResponse transducers, the Sennheiser Momentum True Wireless 3 is one of the best sounding earphones we've ever had the pleasure of reviewing. The earphones support SBC, AAC, aptX and aptX Adaptive codecs, the latter two injecting a dose of detail to the sound. aptX also minimises latency, allowing the video and audio feed to be in close sync. The Sennheiser MTW 3 provides open, detailed sound quality

rivalled by a few in the consumer TWS earphones category. The closest competition in terms of sound is the Sony WF-1000XM4 which provides a bit more analytical, close-to-neutral sound while the Sennheiser packs some more oomph in the bass notes.

The earphones come packing three beamforming microphones per earbud that assist in noise cancellation as well. The caller's voice sounds crisp with minimal distortion and the ambient sound is also subdued considerably when on calls.

BATTERY LIFE

The Sennheiser MTW 3's battery life is rated at 7 hours on the earbuds and 28 hours in total (including the charging case) by the company. When you turn on ANC or Transparency Mode though, the numbers drop significantly. We got 4 hours and 25 minutes from the earbuds alone and the case provided 3 extra charges. While this is decent enough, it doesn't match up to the performance of the Sony WF-1000XM4 and the Jabra Elite 7 Pro.

VERDICT

The Sennheiser Momentum True Wireless 3 embody the word "refined". Sennheiser has improved the earphones in more ways than one but they've stuck to their DNA – what makes Sennheiser earphones, so blatantly Sennheiser. One area Sennheiser needs to turn its attention towards though is battery life, where Momentum earphones have typically lagged behind the competition.

—Dhriti Datta

SPECIFICATIONS

FREQUENCY RESPONSE: 5 Hz to 21 kHz | TRANSDUCER PRINCIPLE: dynamic, closed-back | TRANSDUCER SIZE: 7 mm | MICROPHONE PICK-UP PATTERN: 3 mics per earbud, beamforming | BATTERY LIFE (EARBUDS): 7 hours | BATTERY LIFE (WITH CHARGING CASE): 28 hours | BLUETOOTH VERSION: 5.2 | BLUETOOTH CODECS: SBC, AAC, aptX, aptX Adaptive | IP RATING: IPX4
