

HEART OF THE BEAST

The human heart is a quarter-litre marvel – it is no wonder then that a quarter litre powerplant moves the human heart like no other. When this magical number of 250 cc meets an iconic brand, a new legend begins. At the heart of the legend is the all-new engine powering the biggest, boldest and fastest Pulsar yet – the Pulsar F250. And it's here to get every rider's heart pumping. Or to make it skip a beat. Because a heart is a heart is a heart.
