Best smartphone camera:

₹50,000 edition

Find out which smartphone camera is the most versatile and consistent around the ₹50K price point

Dhriti Datta | dhriti@digit.in

A

smartphone camera is an indispensable utility in the digital world we live in today. Smartphone

cameras are getting increasingly versatile at all price points. In and around the ₹50,000 price point, smartphone cameras rival even flagship setups and provide some fantastic pictures under various scenarios. Two of the most robust camera systems in a smartphone around the ₹50K price point are the Vivo X80 and the Samsung Galaxy

S21 FE. Both phones have been lauded for their camera setups and we decided to pit both the phones against each other to crown a winner. Let's delve right into the comparison.

VIVO X80 CAMERA SPECIFICATIONS

The Vivo X80 sports a triple rear camera setup headlined by a 50 MP Sony IMX866 primary sensor with f/1.8 aperture, laser autofocus, and OIS (optical image stabilisation). You get a 12 MP telephoto lens with f/2.0 aperture and 2x optical zoom capabilities. The third lens is a 12 MP ultrawide shooter with f/2.0 aperture and autofocus. Vivo has partnered with Zeiss for the

Vivo X80's camera system and the phone also comes with the Zeiss T* coating that works towards reducing glare and ghosting in images. The Vivo V1+ chip works with the lenses to process and enhance images and videos.

There's a 32 MP front-facing camera for selfies as well. For video, the phone can shoot 4K at 30/60 fps and 1080p at 30/60 fps from the rear camera. There's also a slow-motion mode. For selfies, you get 1080p video recording at 30 fps.

SAMSUNG GALAXY S21 FE CAMERA SPECIFICATIONS

The Samsung Galaxy S21 FE offers a triple camera setup with a 12 MP
