

UPSKILLING IS THE WAY TO GO!

Refresh your skills to stay relevant, find perfect side gigs, and more!

Dhriti Datta | dhriti@digit.in

As the world was just beginning to show some signs of recovery from the impact of Covid-19, the invasion of Ukraine by Russia provoked new economic challenges. The world is on the brink of recession. The war disrupted the global supply chain, led to currencies around the world tanking, and instigated high inflation; not to forget the senseless harm to human life and property. The top leaders of the world met at Davos recently to discuss global issues and concerns of a looming recession were brought up. While India projected itself as a stable economy and friendly investment destination at the WEF (World Economic Forum), the threat of a global recession hitting India as well cannot be ignored.

INVEST IN YOURSELF!

Whenever the term 'recession' hits the headlines, an urgent sense of worry about job security rises, and with good reason. In the 2008 recession, over 10 per cent US citizens were rendered jobless. Recessions also mean less hiring and growing competition for vacant spots on teams. It is, therefore, essential to take appropriate steps and set yourself

up for success even in light of the coming economic slowdown. Lifelong learning is something everyone should be accustomed to, now more than ever. It is always a wise idea to invest in your own development through upskilling and reskilling courses. Research shows that upskilling of employees is essential, especially now, where AI and automation threatens jobs more than ever.

If you're looking to upskill yourself to safeguard your job during the looming recession, India is, fortunately, host to an array of platforms that allow you to do so. The demand for tech skills has increased tremendously and industries across different sectors value analytical and technical skills in areas such as banking and finance, IT, ML (Machine Learning) and AI. Here are some platforms to consider.

UpGrad

UpGrad is one of the most popular upskilling platforms brimming with a host of programs such as digital marketing, data analytics, project management, digital technology, and data management. The program provides industry-relevant insights and student support services as well. It also helps with placement after course completion.

Coursera

Coursera has a wide portfolio of courses in fields such as computer science, data science, data business, entrepreneurship, science, medicine, creative writing, and much more. These courses are developed by over 140 of the best colleges and universities across the globe. It also offers a free service where you can watch videos to learn skills without paying a rupee, however, you won't be issued a certificate in this case.

Google Digital Garage

Google Digital Garage offers free online courses to help people improve their digital skills. The platform offers an array of courses in the fields of digital marketing, IT specialisation, database administration, and network engineering. You also get free courses
